Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A OV7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A OS9.

Inquiries about this publication should be addressed to:

Building Permits Section,
Construction Division,

Statistics Canada, Ottawa, K1A OT6 (telephone: 995-8213) or to a local Advisory Services office:

St. John's (Nfld.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A OV7, ou à Imprimerie et édition, Approvisionnements et Services Canada, Ottawa, K1A OS9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des permis de bâtir,
Division de la construction,

Statistique Canada, Ottawa, K1A OT6 (téléphone: 995-8213) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Régina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

INTRODUCTION

Statistics Canada conducts a monthly survey of building permits issued in Canada. The material contained in this publication is compiled from data supplied by the issuing municipalities and therefore, varies from municipality to municipality with the terms of each individual by-law, with the methods of estimating the value of construction for permit issuing purposes and with the diligence with which the terms of the by-law are applied. Information is not available on the permits allowed to lapse without the work for which the permit was issued being completed.

This publication presents statistics on building permits issued during the month for each municipality reporting in the survey. Totals are available for provinces, for metropolitan areas, for economic regions, for counties and finally for the country as a whole. Municipalities are listed individually showing building permits issued according to the following classification:

1. **Residential**

   (a) Number of dwelling units created: single, seasonal, double, row, apartment dwellings, conversions of existing structures into new dwelling units, and total number of dwelling units.

   (b) Value of building permits issued for residential construction including residential garages, swimming pools, alterations and improvements.

2. **Non-Residential**

   Value of building permits issued for new construction, alterations and improvements for industrial, commercial, institutional and government construction.

Area totals are the sum of the reporting municipalities and there is no allowance for municipalities not covered in the survey and for municipalities issuing permits but not reporting in the survey for the month in question. In some cases, reports from municipalities are received too late to be included in the relevant compilation; these municipalities are listed in the publication of the following month and a revised summary of building permits by county, by province and for Canada as a whole is made available in that month.

Statistique Canada effectue chaque mois un relevé des permis de bâtir émis au Canada. Les renseignements contenus dans la présente publication proviennent des données transmises par les municipalités qui émettent des permis; la statistique varie donc d'une municipalité à l'autre selon le règlement propre à chacune, selon les méthodes d'estimation des valeurs de construction appliquées aux fins d'émission des permis et selon la diligence avec laquelle les règlements eux-mêmes sont mis à exécution. On ne dispose d'aucun renseignement au sujet des permis pouvant déchoir sans que le travail prévu ait été exécuté.

La présente publication fournit la statistique des permis de bâtir émis au cours du mois par chaque municipalité participant à l'enquête. Des totaux figurent dans le cas des provinces, des zones métropolitaines, des régions économiques, des comtés et pour le Canada entier. Les municipalités sont énumérées individuellement, en regard des permis de bâtir répartis d'après la classification suivante:

1. **Construction domiciliaire**

   (a) Nombre de logements créés sous forme de maisons simples, de chalets, de maisons doubles, en rangée, d'appartements et de transformations de bâtiments en nouveaux logements, et nombre total d'unités de logement.

   (b) Valeur des permis de bâtir émis à l'égard de tous les travaux de construction domiciliaire, y compris les garages, les piscines, les modifications et les améliorations.

2. **Construction non-domiciliaire**

   Valeur des permis de bâtir émis à l'égard des travaux de construction neuve, de modification et d'amélioration à des bâtiments destinés à des fins industrielles, commerciales et institutionnelles ou gouvernementales.

Les totaux régionaux représentent la somme des chiffres fournis par les municipalités faisant rapport; ils ne tiennent pas compte des municipalités non comprises dans l'enquête, ni des municipalités qui émettent des permis mais qui n'ont pas fait rapport pour le mois en cause. Dans certains cas, les rapports de la municipalité parviennent à Statistique Canada trop tard pour qu'on puisse les inclure dans le calcul pertinent; en pareil cas, les données paraissent dans la publication du mois suivant, et l'on publie, ce mois-là, un sommaire révisé des permis de bâtir, par comté, par province et pour le Canada entier.

DEFINITIONS

Residential

Includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

Number of units shown under Residential construction indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains six apartments, it will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included.

Single residential units are structures containing only one dwelling unit completely separated from any other dwelling or structure.

Cottages are seasonal dwellings such as summer homes and house-boats.

Double residential units are dwellings found in structures containing two dwelling units such as duplexes and semi-detached dwellings.

Row dwellings are one-family dwellings in a structure of three or more attached dwellings.

Apartments inclure all multiple housing with three or more units such as triplexes, quadruplexes, row duplexes as well as apartments proper. Flats, regardless of number, which are part of a non-residential structure are also included.

Conversions consist of dwelling units added by conversion of existing structures.

NATURE OF CLASSIFICATION

This classification is one of buildings or structures for which a building permit was issued by a municipality. A building permit may be issued by municipalities for: construction of new buildings; alterations, additions or conversions to existing buildings; installations of heating, plumbing and other facilities; erection of signs, posters, canopies, etc., and other improvements to property.

The classification for **residential** construction is intended to reflect the value of building permits issued for new dwellings: single, seasonal, double, row, apartments and conversions; for alterations and improvements to existing dwellings: additions, structural changes, residential garages and swimming pools, and other improvements to existing structures.

DÉFINITIONS

Construction domiciliaire

Ne comprend que les logements indépendants, à l'exclusion de bâtiments tels que casernes et dortoirs.

Nombre d'unités, qui parait sous la rubrique Construction domiciliaire, correspond au nombre d'unités de logement indépendantes ajoutées. Par exemple, une nouvelle maison d'appartements de six logements comptera pour six unités de logement. Dans le cas de transformation de bâtiments en unités de logement additionnelles, on tient compte du nombre de nouvelles unités créées.

Logement simple s'entend des habitations à logement unique et indépendant de tout autre logement ou bâtiment.

Chalet s'entend de toute habitation saisonnière comme les maisons d'été et les maisons flottantes.

Logement double s'entend de toute maison d'habitation à deux logements comme les maisons jumelées et les duplex.

Logement en rangée s'entend de tout logement unifamilial compris dans un bâtiment formé d'au moins trois logements côte-à-côte.

Logement d'appartements s'entend de toute habitation comprise dans un bâtiment qui contient trois unités ou plus notamment les triplex, les quadruplex, les duplex en rangée et les appartements proprement dits. Quel qu'en soit le nombre, les plain-pied qui font partie d'une construction non domiciliaire sont également comptés.

Transformation comprend le nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

NATURE DE LA CLASSIFICATION

La classification utilisée dans la présente publication porte sur les immeubles ou bâtiments à l'égard desquels la municipalité a émis un permis de bâtir. Une municipalité peut émettre un permis de bâtir aux fins suivantes: construction de nouveaux bâtiments; travaux de modifications, rajouts ou transformations; installation d'appareils de chauffage, de plomberie et autres commodités du genre; érection d'enseignes, d'affiches, de marquises, etc., et autres améliorations d'immeubles.

La classification des bâtiments **domiciliaires** a pour but de montrer la valeur des permis émis pour des logements nouveaux: simple, saisonnier, double, en rangée, d'appartement et de transformation; la valeur des travaux de modification et d'amélioration à des logements existants: rajout, modification, garages, piscines et autres améliorations.

Minor repair jobs such as painting, tiling, roofing etc., made to existing residential buildings in order to return them to their previous states are not included in the building permits series. Estimates of such repair work may be obtained from the publications *Construction in Canada* (Catalogue 64-201, Statistics Canada) and *Public Investment Outlook* (Catalogue 61-205, Statistics Canada).

The classification for **non-residential** buildings or structures is divided into three major groups pertaining to the use of the structures for industrial, commercial and government and institutional purposes. These major groups are further sub-divided into principal categories of each major group.

1. **Industrial** – Includes buildings used for: manufacturing and processing; transportation, communication and other utilities and agriculture, forestry, mine and mine mill buildings.

2. **Commercial** – Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial – signs, posters, heating and plumbing installations, etc.

3. **Institutional and Government** – Includes expenditures made by the community, public and government for buildings and structures – schools, universities, hospitals, clinics, churches, homes for the aged, blind, deaf and dumb, government office and administration buildings, law enforcement, public protection, national defence, and ancillary buildings such as dormitories, residences, church rectories, gymnasiums, heating plants, laundries and cafeterias for hospitals, schools or universities.

BASIS FOR CLASSIFICATION

The Classification of structures into major groups and sub-groups is dependent upon: the intended use of the structure in the case of new buildings; the present or intended use of the building to which alterations and improvements are being made; affiliation of the structure where the proposed structure is to provide ancillary facilities to the existing buildings; the principal use of the building where the intended use of the building is for more than one purpose.

On the building permit forms, the municipality reports; name and address of applicant (owner and agent); location of construction; intended use of the buildings – factory, school, church, etc.; class of work-

Les travaux de réparation qui sont destinés à rétablir un bâtiment dans son état initial (travaux de peinture, réfection de plancher, de toiture, etc.) ne sont pas compris dans la statistique des permis de bâtir. On peut toutefois obtenir une estimation de ces travaux en consultant *La construction au Canada* (nº 64-201 au catalogue de Statistique Canada) et *Perspectives des investissements privés et publics* (nº 61-205 au catalogue de Statistique Canada).

La classification des bâtiments **non domiciliaires** comporte trois groupes principaux fondés sur les destinations suivantes des immeubles: industrielle, commerciale et institutionnelle ou gouvernementale. Ces groupes se subdivisent à leur tour en catégories principales.

1. **Construction industrielle** – Comprend tout bâtiment destiné à la fabrication ou à la transformation de produits; au transport, aux communications et autres services d'utilité publique; à l'agriculture, à la sylviculture, à l'exploitation minière, y compris les installations de traitement des minéraux à la mine.

2. **Construction commerciale** – Comprend les magasins, entrepôts, garages, immeubles de bureaux, théâtres, hôtels, salons funéraires, salons de beauté, ainsi que des installations commerciales diverses – enseignes, affiches, chauffage, plomberie, etc.

3. **Construction institutionnelle et gouvernementale** – Comprend les dépenses faites par les collectivités, les corps publics et les gouvernements pour la construction d'immeubles ou bâtiments; par exemple, écoles, universités, hôpitaux, cliniques, églises, foyers pour vieillards, pour aveugles, pour sourds et muets; bureaux de gouvernement ou d'administration publique, services d'application de la loi, de protection du public, de défense nationale; enfin des bâtiments auxiliaires tels que dortoirs, résidences d'employés de service, presbytères, gymnases, chaufferies, buanderies et cafétérias d'hôpitaux, d'écoles ou d'universités.

FONDEMENT DE LA CLASSIFICATION

La classification des bâtiments en groupes et sous-groupes principaux se fondent sur les éléments ci-après: la destination prévue, dans le cas des immeubles nouveaux; l'utilisation réelle ou prévue des bâtiments auxquels des modifications ou améliorations sont effectuées; affiliation de l'immeuble où la construction envisagée a pour objet d'assurer des commodités accessoires; la principale utilisation de l'immeuble où la construction projetée est destinée à plus d'une fin.

Sur la formule de déclaration des permis de bâtir, la municipalité inscrit: les nom et adresse du requérant (propriétaire et agent); l'emplacement de la construction; la destination de l'immeuble – manufacture, école, église,

done – new, addition, etc.; the value of the proposed construction; and in the case of residential construction, number of dwelling units created.

The description given as to the intended use of the building, forms the basis for classification. If the structure is a new building or a conversion it is classified according to its intended use such as a factory, school, church, hospital, etc. Where the expenditure is of a repair nature, including all improvements to the property, alterations and additions, it may be classified as to the present use of the building, to which alterations are made or its intended use. If the construction work consists of installation of heating, plumbing or other such facilities, it will be classified as to the present use of the building. Where it includes an addition, such as a warehouse to a store, it will be classified to its intended use.

Where the construction work for institutional and government purposes provides additional facilities for existing buildings, these are classified according to the intended use of the existing structures. Examples are heating plants, cafeterias, nurses' residence for hospitals; dormitories, gymnasiums, libraries for universities; ancillary structures on prison farms, on Armed Force bases, etc.

A structure may have more than one intended use and therefore fall into more than one classification, and may be classified as to the principal use of the structure, or the value of proposed construction may be divided into more than one appropriate category. Where part of the structure is to provide additional facilities, whose value in relation to the principal use of the structure is relatively small, it will be classified as to its principal use. If the structure is a store and apartment, store and office building, restaurant and office building, etc., the value of the proposed construction may be divided among the appropriate classifications. However, where the principal use of the structure is a shopping centre but provides additional facilities such as banks, restaurants, etc., it will be classified as stores – the principal use of the structure.

etc.; la catégorie de travaux en cause – construction nouvelle, rajout, etc.; la valeur de la construction projetée et, dans le cas des constructions domiciliaires, le nombre d'unités de logement créé.

La description fournie relativement à l'utilisation éventuelle de l'immeuble constitue le fondement de la classification. S'il s'agit d'un nouveau bâtiment ou d'une transformation, l'ouvrage est classé selon sa destination – manufacture, école, église, hôpital, etc. Lorsque la dépense a pour objet des travaux de réparation, y compris toutes améliorations de propriété, modifications et rajouts, son classement peut s'effectuer en fonction de l'emploi que l'on fait déjà du bâtiment existant ou de la fin à laquelle on le destine. Si les travaux consistent en l'installation d'un système de chauffage, de plomberie ou d'autres commodités du genre, on les classe selon la fin à laquelle le bâtiment sert déjà. Lorsque les travaux comprennent un rajout, par exemple, l'addition d'un entrepôt à un magasin, le classement se fait d'après l'utilisation projetée.

Dans le cas où les travaux de construction effectués à des fins institutionnelles ou gouvernementales doivent assurer des commodités supplémentaires à des bâtiments existants, ces travaux sont classés d'après l'usage que l'on se propose de faire de l'immeuble existant. Voici des exemples pertinents: chaufferies, caféterias, résidences d'infirmières pour hôpitaux; dortoirs, gymnases, bibliothèques d'universités; constructions auxiliaires dans des fermes-prisons ou dans des bases des forces armées, etc.

Étant donné qu'une même construction peut être destinée à des fins multiples, elle peut rentrer dans plus d'une classe; il est possible, en effet, de classer pareille construction d'après sa destination principale, ou de répartir la valeur des travaux entre diverses catégories appropriées. Si une partie de l'immeuble a pour objet d'assurer des commodités supplémentaires dont la valeur, par rapport à l'utilisation principale dudit immeuble, se révèle passablement faible, les travaux seront classés en fonction du principal usage de l'immeuble lui-même. S'il s'agit d'un bâtiment formé d'un magasin et d'un appartement, d'un magasin et de bureaux, d'un restaurant et de bureaux, etc., la valeur de la construction projetée peut être répartie entre les diverses catégories appropriées. Cependant, si une construction sert surtout de centre commercial tout en offrant des services supplémentaires (banques, restaurants, etc.), on la classe parmi les magasins, ce qui correspond en l'occurence au principal emploi de la dite construction.

COVERAGE

The coverage of the Building Permits Survey can best be expressed in terms of the population of municipalities covered in the survey compared to the total population. Regular users of this publication will note that the table on page 11 reflects the coverage in terms of the 1976 Census population. For the purpose of approximating the coverage of the Building Permits Survey, the breakdown of the population into rural and urban areas is based on the rural-urban definition shown in the official 1976 Census. The urban population in 1976 consisted mainly of the population residing in cities, towns and villages, whether incorporated or not, and the "urbanized" or built-up residential fringes having a minimum population of 1,000 population and a density of at least 1,000 per square mile. The rest of the population was classified as rural.

In this publication, Metropolitan Areas are based on the 1976 Census definitions. They are defined as the main labour markets of a continuous builtup area having a population of 100,000 or more, corresponding to a commuting field or a zone where people could normally change their place of work without changing their place of residence. Although the 1976 Census defined Ottawa-Hull as a single metropolitan area, this publication treats this area as two distinct entities in their respective province.

Statistics Canada is currently endeavouring to extend the coverage of the survey in order to secure data from all municipalities issuing building permits. Thus, the coverage in terms of population may be expected to increase marginally, the population of the municipalities not reporting in the survey taken as a group being relatively small.

Although the results of the Building Permits Survey are often used as a leading indicator of building activity they may not be construed as representing the total construction activity in the country. Larger projects of a utilitarian character such as hydro-electric developments, filtration plants, pipelines, highways do not generally require building permits, and frequently large industrial plants are constructed outside the boundaries of a building permit issuing municipality.

COUVERTURE

La meilleure façon de mesurer la couverture de l'enquête sur les permis de bâtir consiste à comparer le chiffre de la population des municipalités visées au chiffre de la population totale. Les usagers de la présente publication remarqueront que le tableau de la page 11 donne un aperçu de la couverture de l'enquête en termes de la population du recensement 1976. Afin d'avoir une approximation de la couverture de l'enquête sur les permis de bâtir, la répartition rurale-urbaine de la population se fonde sur celle qui a été utilisée lors du recensement de 1976. La population urbaine en 1976 comprenait celle des cités, villes et villages de 1,000 habitants et plus, constitués ou non, et des zones "urbanisées" ou bâties à la périphérie, ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré. Le reste de la population était classée rurale.

Dans le présent rapport, les zones métropolitaines sont délimitées par les définitions du recensement de 1976. Elles sont définies comme le principal marché de travail d'une zone habitée continue ayant une population d'au moins 100,000 habitants, correspondant à une zone de déplacements quotidiens, soit celle dont les habitants pourraient normalement changer de lieu de travail sans changer de lieu de résidence. Bien que le recensement de 1976 définisse Ottawa-Hull comme une seule zone métropolitaine, la présente publication traite cette zone comme deux entités distinctes parce que situées dans des provinces différentes.

Statistique Canada essaie constamment d'étendre la couverture de l'enquête afin d'obtenir des données de toutes les municipalités émettant des permis de construire. On peut donc s'attendre que la couverture, exprimée en chiffre de population, s'accroisse, mais de peu seulement, vue que la population de l'ensemble des municipalités non soumises à l'enquête est relativement faible.

Même si les résultats de l'enquête sur les permis de bâtir sont souvent considérés comme un indicateur important de l'activité du bâtiment, on ne saurait estimer qu'ils représentent l'activité globale de la construction au pays. En effet, de vastes entreprises comme l'aménagement d'installations hydro-électriques, de pipelines et de routes ne requièrent pas de permis de bâtir et, bien souvent, de grandes usines se construisent en dehors des limites de toute municipalité émettant des permis de bâtir.

EXPLANATORY NOTES

The letter "L" after the name of a municipality indicates that the report of this municipality was not received on time for publication. If the letter "L" is not present and all columns contain a dash (–), this indicates that a "nil" report was received or that the value of permits issued during the month was less than $500.

The asterisk before the name of a municipality (Tables 11 and 12) indicates that it is a Metropolitan Area or a municipality comprised in an urban agglomeration of 10,000 population or more.

All current data are preliminary.

ABBREVIATIONS USED

Bor – Borough
C – City
CM – County Municipality
DM – District Municipality
ID – Improvement District
LGC – Local Government Community
LID – Local Improvement District
MD – Municipal District
P – Parish
PDC – Planning District Commission
RD – Rural District
RM – Rural Municipality
SV – Summer Village
T – Town
TP – Township
VL – Village

NOTES EXPLICATIVES

La présence de la lettre "L" après le nom d'une municipalité signifie que Statistique Canada n'a pas reçu de rapport de la municipalité à temps. Si la lettre "L" ne figure pas et que toutes les colonnes renferment un tiret (–), cela signifie qu'un rapport marqué "néant" a été reçu ou que la valeur des permis émis durant le mois en cause était inférieure à $500.

L'astérisque qui précède le nom d'une municipalité (tableaux 11 et 12) signifie qu'il s'agit d'une zone métropolitaine ou d'une municipalité comprise dans une agglomération urbaine de 10,000 âmes et plus.

Les chiffres courants sont préliminaires.

ABRÉVIATIONS EMPLOYÉES

VL – Village

TABLE I. Approximate Coverage of the Building Permits Survey in 1981

TABLEAU I. Couverture approximative de l'enquête sur les permis de bâtir en 1981

Province	Total population Population totale 1976	Population of municipalities reporting in the survey — Population des municipalités ayant fait rapport	Per cent coverage Pourcentage de couverture
Newfoundland — Terre-Neuve	557,725	322,918	57.89
Urban — Urbaine	320,327	268,118	83.70
Rural — Rurale	237,398	54,800	23.08
Prince Edward Island — Île-du-Prince-Edouard	118,229	118,029	99.83
Urban — Urbaine	43,879	43,879	100.00
Rural — Rurale	74,350	74,150	99.73
Nova Scotia — Nouvelle-Écosse	828,571	795,229	95.97
Urban — Urbaine	462,588	457,648	98.93
Rural — Rurale	365,983	337,581	92.24
New Brunswick — Nouveau-Brunswick	677,250	526,220	77.69
Urban — Urbaine	354,418	343,446	96.90
Rural — Rurale	322,832	182,774	56.61
Québec	6,234,445	5,424,638	87.01
Urban — Urbaine	4,927,367	4,793,792	97.28
Rural — Rurale	1,307,078	630,846	48.26
Ontario	8,264,465	7,790,100	94.26
Urban — Urbaine	6,708,520	6,683,131	99.62
Rural — Rurale	1,555,945	1,106,969	71.14
Manitoba	1,021,506	767,112	75.09
Urban — Urbaine	714,482	685,781	95.98
Rural — Rurale	307,024	81,331	26.49
Saskatchewan	921,323	566,040	61.43
Urban — Urbaine	511,331	495,744	96.95
Rural — Rurale	409,992	70,296	17.14
Alberta	1,838,037	1,667,455	90.71
Urban — Urbaine	1,379,166	1,378,837	99.97
Rural — Rurale	458,871	288,618	62.89
British Columbia — Colombie-Britannique	2,466,608	2,289,278	92.81
Urban — Urbaine	1,897,086	1,852,443	97.64
Rural — Rurale	569,522	436,835	76.70
Yukon and North West Territories — Yukon et Territoires du Nord-Ouest	64,445	35,648	55.32
Urban — Urbaine	34,474	27,123	78.68
Rural — Rurale	29,971	8,525	28.44
Canada	**22,992,604**	**20,302,667**	**88.30**
Urban — Urbaine	**17,353,638**	**17,029,942**	**98.13**
Rural — Rurale	**5,638,966**	**3,272,725**	**58.03**

TABLE II. Value of Building Permits Issued in Canada, by Month: Unadjusted Data, 1978-1981

TABLEAU II. Valeur des permis de bâtir émis au Canada: données non-désaisonnalisées, 1978-1981

	Dwelling units – Logements			Estimated value of construction – Valeur estimative de la construction					
	Singles – Simples	Multiples	Total	Residential – Domiciliaire	Industrial – Industrielle	Commercial – Commerciale	Institutional and governmental – Institutionnelle et gouvernementale	Total non-residential – Total non-domiciliaire	Total
	units – unités			thousands of dollars – milliers de dollars					
	Cumulative (7 month – 7 mois) cumulatives								
1978	65,522	55,363	120,885	4,292,570	555,964	1,594,483	732,041	2,882,488	7,175,058
1979	64,015	41,348	105,363	4,361,597	718,725	1,968,149	704,665	3,391,539	7,753,136
1980	49,223	33,938	83,161	3,899,864	924,136	2,193,600	970,101	4,087,837	7,987,701
1981	63,439	49,548	112,987	5,988,605	965,312	2,694,622	916,754	4,576,688	10,565,293

Statistics Canada Statistique Canada

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A OV7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A OS9.

Inquiries about this publication should be addressed to:

Building Permits Section,
Construction Division,

Statistics Canada, Ottawa, K1A OT6 (telephone: 995-8213) or to a local Advisory Services office:

St. John's (Nfld.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A OV7, ou à Imprimerie et édition, Approvisionnements et Services Canada, Ottawa, K1A OS9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des permis de bâtir,
Division de la construction,

Statistique Canada, Ottawa, K1A OT6 (téléphone: 995-8213) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

INTRODUCTION

Statistics Canada conducts a monthly survey of building permits issued in Canada. The material contained in this publication is compiled from data supplied by the issuing municipalities and therefore, varies from municipality to municipality with the terms of each individual by-law, with the methods of estimating the value of construction for permit issuing purposes and with the diligence with which the terms of the by-law are applied. Information is not available on the permits allowed to lapse without the work for which the permit was issued being completed.

This publication presents statistics on building permits issued during the month for each municipality reporting in the survey. Totals are available for provinces, for metropolitan areas, for economic regions, for counties and finally for the country as a whole. Municipalities are listed individually showing building permits issued according to the following classification:

1. **Residential**

   (a) Number of dwelling units created: single, seasonal, double, row, apartment dwellings, conversions of existing structures into new dwelling units, and total number of dwelling units.

   (b) Value of building permits issued for residential construction including residential garages, swimming pools, alterations and improvements.

2. **Non-Residential**

   Value of building permits issued for new construction, alterations and improvements for industrial, commercial, institutional and government construction.

Area totals are the sum of the reporting municipalities and there is no allowance for municipalities not covered in the survey and for municipalities issuing permits but not reporting in the survey for the month in question. In some cases, reports from municipalities are received too late to be included in the relevant compilation; these municipalities are listed in the publication of the following month and a revised summary of building permits by county, by province and for Canada as a whole is made available in that month.

Statistique Canada effectue chaque mois un relevé des permis de bâtir émis au Canada. Les renseignements contenus dans la présente publication proviennent des données transmises par les municipalités qui émettent des permis; la statistique varie donc d'une municipalité à l'autre selon le règlement propre à chacune, selon les méthodes d'estimation des valeurs de construction appliquées aux fins d'émission des permis et selon la diligence avec laquelle les règlements eux-mêmes sont mis à exécution. On ne dispose d'aucun renseignement au sujet des permis pouvant déchoir sans que le travail prévu ait été exécuté.

La présente publication fournit la statistique des permis de bâtir émis au cours du mois par chaque municipalité participant à l'enquête. Des totaux figurent dans le cas des provinces, des zones métropolitaines, des régions économiques, des comtés et pour le Canada entier. Les municipalités sont énumérées individuellement, en regard des permis de bâtir répartis d'après la classification suivante:

1. **Construction domiciliaire**

   (a) Nombre de logements créés sous forme de maisons simples, de chalets, de maisons doubles, en rangée, d'appartements et de transformations de bâtiments en nouveaux logements, et nombre total d'unités de logement.

   (b) Valeur des permis de bâtir émis à l'égard de tous les travaux de construction domiciliaire, y compris les garages, les piscines, les modifications et les améliorations.

2. **Construction non-domiciliaire**

   Valeur des permis de bâtir émis à l'égard des travaux de construction neuve, de modification et d'amélioration à des bâtiments destinés à des fins industrielles, commerciales et institutionnelles ou gouvernementales.

Les totaux régionaux représentent la somme des chiffres fournis par les municipalités faisant rapport; ils ne tiennent pas compte des municipalités non comprises dans l'enquête, ni des municipalités qui émettent des permis mais qui n'ont pas fait rapport pour le mois en cause. Dans certains cas, les rapports de la municipalité parviennent à Statistique Canada trop tard pour qu'on puisse les inclure dans le calcul pertinent; en pareil cas, les données paraissent dans la publication du mois suivant, et l'on publie, ce mois-là, un sommaire révisé des permis de bâtir, par comté, par province et pour le Canada entier.

DEFINITIONS

Residential

Includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

Number of units shown under Residential construction indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains six apartments, it will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included.

Single residential units are structures containing only one dwelling unit completely separated from any other dwelling or structure.

Cottages are seasonal dwellings such as summer homes and house-boats.

Double residential units are dwellings found in structures containing two dwelling units such as duplexes and semi-detached dwellings.

Row dwellings are one-family dwellings in a structure of three or more attached dwellings.

Apartments inclure all multiple housing with three or more units such as triplexes, quadruplexes, row duplexes as well as apartments proper. Flats, regardless of number, which are part of a non-residential structure are also included.

Conversions consist of dwelling units added by conversion of existing structures.

NATURE OF CLASSIFICATION

This classification is one of buildings or structures for which a building permit was issued by a municipality. A building permit may be issued by municipalities for: construction of new buildings; alterations, additions or conversions to existing buildings; installations of heating, plumbing and other facilities; erection of signs, posters, canopies, etc., and other improvements to property.

The classification for **residential** construction is intended to reflect the value of building permits issued for new dwellings: single, seasonal, double, row, apartments and conversions; for alterations and improvements to existing dwellings: additions, structural changes, residential garages and swimming pools, and other improvements to existing structures.

DÉFINITIONS

Construction domiciliaire

Ne comprend que les logements indépendants, à l'exclusion de bâtiments tels que casernes et dortoirs.

Nombre d'unités, qui parait sous la rubrique Construction domiciliaire, correspond au nombre d'unités de logement indépendantes ajoutées. Par exemple, une nouvelle maison d'appartements de six logements comptera pour six unités de logement. Dans le cas de transformation de bâtiments en unités de logement additionnelles, on tient compte du nombre de nouvelles unités créées.

Logement simple s'entend des habitations à logement unique et indépendant de tout autre logement ou bâtiment.

Chalet s'entend de toute habitation saisonnière comme les maisons d'été et les maisons flottantes.

Logement double s'entend de toute maison d'habitation à deux logements comme les maisons jumelées et les duplex.

Logement en rangée s'entend de tout logement unifamilial compris dans un bâtiment formé d'au moins trois logements côte-à-côte.

Logement d'appartements s'entend de toute habitation comprise dans un bâtiment qui contient trois unités ou plus notamment les triplex, les quadruplex, les duplex en rangée et les appartements proprement dits. Quel qu'en soit le nombre, les plain-pied qui font partie d'une construction non domiciliaire sont également comptés.

Transformation comprend le nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

NATURE DE LA CLASSIFICATION

La classification utilisée dans la présente publication porte sur les immeubles ou bâtiments à l'égard desquels la municipalité a émis un permis de bâtir. Une municipalité peut émettre un permis de bâtir aux fins suivantes: construction de nouveaux bâtiments; travaux de modifications, rajouts ou transformations; installation d'appareils de chauffage, de plomberie et autres commodités du genre; érection d'enseignes, d'affiches, de marquises, etc., et autres améliorations d'immeubles.

La classification des bâtiments **domiciliaires** a pour but de montrer la valeur des permis émis pour des logements nouveaux: simple, saisonnier, double, en rangée, d'appartement et de transformation; la valeur des travaux de modification et d'amélioration à des logements existants: rajout, modification, garages, piscines et autres améliorations.

Minor repair jobs such as painting, tiling, roofing etc., made to existing residential buildings in order to return them to their previous states are not included in the building permits series. Estimates of such repair work may be obtained from the publications *Construction in Canada* (Catalogue 64-201, Statistics Canada) and *Public Investment Outlook* (Catalogue 61-205, Statistics Canada).

The classification for **non-residential** buildings or structures is divided into three major groups pertaining to the use of the structures for industrial, commercial and government and institutional purposes. These major groups are further sub-divided into principal categories of each major group.

1. **Industrial** – Includes buildings used for: manufacturing and processing; transportation, communication and other utilities and agriculture, forestry, mine and mine mill buildings.

2. **Commercial** – Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial – signs, posters, heating and plumbing installations, etc.

3. **Institutional and Government** – Includes expenditures made by the community, public and government for buildings and structures – schools, universities, hospitals, clinics, churches, homes for the aged, blind, deaf and dumb, government office and administration buildings, law enforcement, public protection, national defence, and ancillary buildings such as dormitories, residences, church rectories, gymnasiums, heating plants, laundries and cafeterias for hospitals, schools or universities.

BASIS FOR CLASSIFICATION

The Classification of structures into major groups and sub-groups is dependent upon: the intended use of the structure in the case of new buildings; the present or intended use of the building to which alterations and improvements are being made; affiliation of the structure where the proposed structure is to provide ancillary facilities to the existing buildings; the principal use of the building where the intended use of the building is for more than one purpose.

On the building permit forms, the municipality reports; name and address of applicant (owner and agent); location of construction; intended use of the buildings – factory, school, church, etc.; class of work-

Les travaux de réparation qui sont destinés à rétablir un bâtiment dans son état initial (travaux de peinture, réfection de plancher, de toiture, etc.) ne sont pas compris dans la statistique des permis de bâtir. On peut toutefois obtenir une estimation de ces travaux en consultant *La construction au Canada* (nº 64-201 au catalogue de Statistique Canada) et *Perspectives des investissements privés et publics* (nº 61-205 au catalogue de Statistique Canada).

La classification des bâtiments **non domiciliaires** comporte trois groupes principaux fondés sur les destinations suivantes des immeubles: industrielle, commerciale et institutionnelle ou gouvernementale. Ces groupes se subdivisent à leur tour en catégories principales.

1. **Construction industrielle** – Comprend tout bâtiment destiné à la fabrication ou à la transformation de produits; au transport, aux communications et autres services d'utilité publique; à l'agriculture, à la sylviculture, à l'exploitation minière, y compris les installations de traitement des minéraux à la mine.

2. **Construction commerciale** – Comprend les magasins, entrepôts, garages, immeubles de bureaux, théâtres, hôtels, salons funéraires, salons de beauté, ainsi que des installations commerciales diverses – enseignes, affiches, chauffage, plomberie, etc.

3. **Construction institutionnelle et gouvernementale** – Comprend les dépenses faites par les collectivités, les corps publics et les gouvernements pour la construction d'immeubles ou bâtiments; par exemple, écoles, universités, hôpitaux, cliniques, églises, foyers pour vieillards, pour aveugles, pour sourds et muets; bureaux de gouvernement ou d'administration publique, services d'application de la loi, de protection du public, de défense nationale; enfin des bâtiments auxiliaires tels que dortoirs, résidences d'employés de service, presbytères, gymnases, chaufferies, buanderies et cafétérias d'hôpitaux, d'écoles ou d'universités.

FONDEMENT DE LA CLASSIFICATION

La classification des bâtiments en groupes et sous-groupes principaux se fondent sur les éléments ci-après: la destination prévue, dans le cas des immeubles nouveaux; l'utilisation réelle ou prévue des bâtiments auxquels des modifications ou améliorations sont effectuées; affiliation de l'immeuble où la construction envisagée a pour objet d'assurer des commodités accessoires; la principale utilisation de l'immeuble où la construction projetée est destinée à plus d'une fin.

Sur la formule de déclaration des permis de bâtir, la municipalité inscrit: les nom et adresse du requérant (propriétaire et agent); l'emplacement de la construction; la destination de l'immeuble – manufacture, école, église,

done – new, addition, etc.; the value of the proposed construction; and in the case of residential construction, number of dwelling units created.

The description given as to the intended use of the building, forms the basis for classification. If the structure is a new building or a conversion it is classified according to its intended use such as a factory, school, church, hospital, etc. Where the expenditure is of a repair nature, including all improvements to the property, alterations and additions, it may be classified as to the present use of the building, to which alterations are made or its intended use. If the construction work consists of installation of heating, plumbing or other such facilities, it will be classified as to the present use of the building. Where it includes an addition, such as a warehouse to a store, it will be classified to its intended use.

Where the construction work for institutional and government purposes provides additional facilities for existing buildings, these are classified according to the intended use of the existing structures. Examples are heating plants, cafeterias, nurses' residence for hospitals; dormitories, gymnasiums, libraries for universities; ancillary structures on prison farms, on Armed Force bases, etc.

A structure may have more than one intended use and therefore fall into more than one classification, and may be classified as to the principal use of the structure, or the value of proposed construction may be divided into more than one appropriate category. Where part of the structure is to provide additional facilities, whose value in relation to the principal use of the structure is relatively small, it will be classified as to its principal use. If the structure is a store and apartment, store and office building, restaurant and office building, etc., the value of the proposed construction may be divided among the appropriate classifications. However, where the principal use of the structure is a shopping centre but provides additional facilities such as banks, restaurants, etc., it will be classified as stores – the principal use of the structure.

etc.; la catégorie de travaux en cause – construction nouvelle, rajout, etc.; la valeur de la construction projetée et, dans le cas des constructions domiciliaires, le nombre d'unités de logement créé.

La description fournie relativement à l'utilisation éventuelle de l'immeuble constitue le fondement de la classification. S'il s'agit d'un nouveau bâtiment ou d'une transformation, l'ouvrage est classé selon sa destination – manufacture, école, église, hôpital, etc. Lorsque la dépense a pour objet des travaux de réparation, y compris toutes améliorations de propriété, modifications et rajouts, son classement peut s'effectuer en fonction de l'emploi que l'on fait déjà du bâtiment existant ou de la fin à laquelle on le destine. Si les travaux consistent en l'installation d'un système de chauffage, de plomberie ou d'autres commodités du genre, on les classe selon la fin à laquelle le bâtiment sert déjà. Lorsque les travaux comprennent un rajout, par exemple, l'addition d'un entrepôt à un magasin, le classement se fait d'après l'utilisation projetée.

Dans le cas où les travaux de construction effectués à des fins institutionnelles ou gouvernementales doivent assurer des commodités supplémentaires à des bâtiments existants, ces travaux sont classés d'après l'usage que l'on se propose de faire de l'immeuble existant. Voici des exemples pertinents: chaufferies, caféterias, résidences d'infirmières pour hôpitaux; dortoirs, gymnases, bibliothèques d'universités; constructions auxiliaires dans des fermes-prisons ou dans des bases des forces armées, etc.

Étant donné qu'une même construction peut être destinée à des fins multiples, elle peut rentrer dans plus d'une classe; il est possible, en effet, de classer pareille construction d'après sa destination principale, ou de répartir la valeur des travaux entre diverses catégories appropriées. Si une partie de l'immeuble a pour objet d'assurer des commodités supplémentaires dont la valeur, par rapport à l'utilisation principale dudit immeuble, se révèle passablement faible, les travaux seront classés en fonction du principal usage de l'immeuble lui-même. S'il s'agit d'un bâtiment formé d'un magasin et d'un appartement, d'un magasin et de bureaux, d'un restaurant et de bureaux, etc., la valeur de la construction projetée peut être répartie entre les diverses catégories appropriées. Cependant, si une construction sert surtout de centre commercial tout en offrant des services supplémentaires (banques, restaurants, etc.), on la classe parmi les magasins, ce qui correspond en l'occurence au principal emploi de la dite construction.

COVERAGE

The coverage of the Building Permits Survey can best be expressed in terms of the population of municipalities covered in the survey compared to the total population. Regular users of this publication will note that the table on page 11 reflects the coverage in terms of the 1976 Census population. For the purpose of approximating the coverage of the Building Permits Survey, the breakdown of the population into rural and urban areas is based on the rural-urban definition shown in the official 1976 Census. The urban population in 1976 consisted mainly of the population residing in cities, towns and villages, whether incorporated or not, and the "urbanized" or built-up residential fringes having a minimum population of 1,000 population and a density of at least 1,000 per square mile. The rest of the population was classified as rural.

In this publication, Metropolitan Areas are based on the 1976 Census definitions. They are defined as the main labour markets of a continuous builtup area having a population of 100,000 or more, corresponding to a commuting field or a zone where people could normally change their place of work without changing their place of residence. Although the 1976 Census defined Ottawa-Hull as a single metropolitan area, this publication treats this area as two distinct entities in their respective province.

Statistics Canada is currently endeavouring to extend the coverage of the survey in order to secure data from all municipalities issuing building permits. Thus, the coverage in terms of population may be expected to increase marginally, the population of the municipalities not reporting in the survey taken as a group being relatively small.

Although the results of the Building Permits Survey are often used as a leading indicator of building activity they may not be construed as representing the total construction activity in the country. Larger projects of a utilitarian character such as hydro-electric developments, filtration plants, pipelines, highways do not generally require building permits, and frequently large industrial plants are constructed outside the boundaries of a building permit issuing municipality.

COUVERTURE

La meilleure façon de mesurer la couverture de l'enquête sur les permis de bâtir consiste à comparer le chiffre de la population des municipalités visées au chiffre de la population totale. Les usagers de la présente publication remarqueront que le tableau de la page 11 donne un aperçu de la couverture de l'enquête en termes de la population du recensement 1976. Afin d'avoir une approximation de la couverture de l'enquête sur les permis de bâtir, la répartition rurale-urbaine de la population se fonde sur celle qui a été utilisée lors du recensement de 1976. La population urbaine en 1976 comprenait celle des cités, villes et villages de 1,000 habitants et plus, constitués ou non, et des zones "urbanisées" ou bâties à la périphérie, ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré. Le reste de la population était classée rurale.

Dans le présent rapport, les zones métropolitaines sont délimitées par les définitions du recensement de 1976. Elles sont définies comme le principal marché de travail d'une zone habitée continue ayant une population d'au moins 100,000 habitants, correspondant à une zone de déplacements quotidiens, soit celle dont les habitants pourraient normalement changer de lieu de travail sans changer de lieu de résidence. Bien que le recensement de 1976 définisse Ottawa-Hull comme une seule zone métropolitaine, la présente publication traite cette zone comme deux entités distinctes parce que situées dans des provinces différentes.

Statistique Canada essaie constamment d'étendre la couverture de l'enquête afin d'obtenir des données de toutes les municipalités émettant des permis de construire. On peut donc s'attendre que la couverture, exprimée en chiffre de population, s'accroisse, mais de peu seulement, vue que la population de l'ensemble des municipalités non soumises à l'enquête est relativement faible.

Même si les résultats de l'enquête sur les permis de bâtir sont souvent considérés comme un indicateur important de l'activité du bâtiment, on ne saurait estimer qu'ils représentent l'activité globale de la construction au pays. En effet, de vastes entreprises comme l'aménagement d'installations hydro-électriques, de pipelines et de routes ne requièrent pas de permis de bâtir et, bien souvent, de grandes usines se construisent en dehors des limites de toute municipalité émettant des permis de bâtir.

EXPLANATORY NOTES

The letter "L" after the name of a municipality indicates that the report of this municipality was not received on time for publication. If the letter "L" is not present and all columns contain a dash (–), this indicates that a "nil" report was received or that the value of permits issued during the month was less than $500.

The asterisk before the name of a municipality (Tables 11 and 12) indicates that it is a Metropolitan Area or a municipality comprised in an urban agglomeration of 10,000 population or more.

All current data are preliminary.

ABBREVIATIONS USED

Bor – Borough
C – City
CM – County Municipality
DM – District Municipality
ID – Improvement District
LGC – Local Government Community
LID – Local Improvement District
MD – Municipal District
P – Parish
PDC – Planning District Commission
RD – Rural District
RM – Rural Municipality
SV – Summer Village
T – Town
TP – Township
VL – Village

NOTES EXPLICATIVES

La présence de la lettre "L" après le nom d'une municipalité signifie que Statistique Canada n'a pas reçu de rapport de la municipalité à temps. Si la lettre "L" ne figure pas et que toutes les colonnes renferment un tiret (–), cela signifie qu'un rapport marqué "néant" a été reçu ou que la valeur des permis émis durant le mois en cause était inférieure à $500.

L'astérisque qui précède le nom d'une municipalité (tableaux 11 et 12) signifie qu'il s'agit d'une zone métropolitaine ou d'une municipalité comprise dans une agglomération urbaine de 10,000 âmes et plus.

Les chiffres courants sont préliminaires.

ABRÉVIATIONS EMPLOYÉES

C – Cité

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A OV7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A OS9.

Inquiries about this publication should be addressed to:

Building Permits Section,
Construction Division,

Statistics Canada, Ottawa, K1A OT6 (telephone: 995-8213) or to a local Advisory Services office:

St. John's (Nfld.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A OV7, ou à Imprimerie et édition, Approvisionnements et Services Canada, Ottawa, K1A OS9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des permis de bâtir,
Division de la construction,

Statistique Canada, Ottawa, K1A OT6 (téléphone: 995-8213) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

INTRODUCTION

Statistics Canada conducts a monthly survey of building permits issued in Canada. The material contained in this publication is compiled from data supplied by the issuing municipalities and therefore, varies from municipality to municipality with the terms of each individual by-law, with the methods of estimating the value of construction for permit issuing purposes and with the diligence with which the terms of the by-law are applied. Information is not available on the permits allowed to lapse without the work for which the permit was issued being completed.

This publication presents statistics on building permits issued during the month for each municipality reporting in the survey. Totals are available for provinces, for metropolitan areas, for economic regions, for counties and finally for the country as a whole. Municipalities are listed individually showing building permits issued according to the following classification:

1. **Residential**

   (a) Number of dwelling units created: single, seasonal, double, row, apartment dwellings, conversions of existing structures into new dwelling units, and total number of dwelling units.

   (b) Value of building permits issued for residential construction including residential garages, swimming pools, alterations and improvements.

2. **Non-Residential**

   Value of building permits issued for new construction, alterations and improvements for industrial, commercial, institutional and government construction.

Area totals are the sum of the reporting municipalities and there is no allowance for municipalities not covered in the survey and for municipalities issuing permits but not reporting in the survey for the month in question. In some cases, reports from municipalities are received too late to be included in the relevant compilation; these municipalities are listed in the publication of the following month and a revised summary of building permits by county, by province and for Canada as a whole is made available in that month.

Statistique Canada effectue chaque mois un relevé des permis de bâtir émis au Canada. Les renseignements contenus dans la présente publication proviennent des données transmises par les municipalités qui émettent des permis; la statistique varie donc d'une municipalité à l'autre selon le règlement propre à chacune, selon les méthodes d'estimation des valeurs de construction appliquées aux fins d'émission des permis et selon la diligence avec laquelle les règlements eux-mêmes sont mis à exécution. On ne dispose d'aucun renseignement au sujet des permis pouvant déchoir sans que le travail prévu ait été exécuté.

La présente publication fournit la statistique des permis de bâtir émis au cours du mois par chaque municipalité participant à l'enquête. Des totaux figurent dans le cas des provinces, des zones métropolitaines, des régions économiques, des comtés et pour le Canada entier. Les municipalités sont énumérées individuellement, en regard des permis de bâtir répartis d'après la classification suivante:

1. **Construction domiciliaire**

   (a) Nombre de logements créés sous forme de maisons simples, de chalets, de maisons doubles, en rangée, d'appartements et de transformations de bâtiments en nouveaux logements, et nombre total d'unités de logement.

   (b) Valeur des permis de bâtir émis à l'égard de tous les travaux de construction domiciliaire, y compris les garages, les piscines, les modifications et les améliorations.

2. **Construction non-domiciliaire**

   Valeur des permis de bâtir émis à l'égard des travaux de construction neuve, de modification et d'amélioration à des bâtiments destinés à des fins industrielles, commerciales et institutionnelles ou gouvernementales.

Les totaux régionaux représentent la somme des chiffres fournis par les municipalités faisant rapport; ils ne tiennent pas compte des municipalités non comprises dans l'enquête, ni des municipalités qui émettent des permis mais qui n'ont pas fait rapport pour le mois en cause. Dans certains cas, les rapports de la municipalité parviennent à Statistique Canada trop tard pour qu'on puisse les inclure dans le calcul pertinent; en pareil cas, les données paraissent dans la publication du mois suivant, et l'on publie, ce mois-là, un sommaire révisé des permis de bâtir, par comté, par province et pour le Canada entier.

DEFINITIONS

Residential

Includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

Number of units shown under Residential construction indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains six apartments, it will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included.

Single residential units are structures containing only one dwelling unit completely separated from any other dwelling or structure.

Cottages are seasonal dwellings such as summer homes and house-boats.

Double residential units are dwellings found in structures containing two dwelling units such as duplexes and semi-detached dwellings.

Row dwellings are one-family dwellings in a structure of three or more attached dwellings.

Apartments inclure all multiple housing with three or more units such as triplexes, quadruplexes, row duplexes as well as apartments proper. Flats, regardless of number, which are part of a non-residential structure are also included.

Conversions consist of dwelling units added by conversion of existing structures.

NATURE OF CLASSIFICATION

This classification is one of buildings or structures for which a building permit was issued by a municipality. A building permit may be issued by municipalities for: construction of new buildings; alterations, additions or conversions to existing buildings; installations of heating, plumbing and other facilities; erection of signs, posters, canopies, etc., and other improvements to property.

The classification for **residential** construction is intended to reflect the value of building permits issued for new dwellings: single, seasonal, double, row, apartments and conversions; for alterations and improvements to existing dwellings: additions, structural changes, residential garages and swimming pools, and other improvements to existing structures.

DÉFINITIONS

Construction domiciliaire

Ne comprend que les logements indépendants, à l'exclusion de bâtiments tels que casernes et dortoirs.

Nombre d'unités, qui parait sous la rubrique Construction domiciliaire, correspond au nombre d'unités de logement indépendantes ajoutées. Par exemple, une nouvelle maison d'appartements de six logements comptera pour six unités de logement. Dans le cas de transformation de bâtiments en unités de logement additionnelles, on tient compte du nombre de nouvelles unités créées.

Logement simple s'entend des habitations à logement unique et indépendant de tout autre logement ou bâtiment.

Chalet s'entend de toute habitation saisonnière comme les maisons d'été et les maisons flottantes.

Logement double s'entend de toute maison d'habitation à deux logements comme les maisons jumelées et les duplex.

Logement en rangée s'entend de tout logement unifamilial compris dans un bâtiment formé d'au moins trois logements côte-à-côte.

Logement d'appartements s'entend de toute habitation comprise dans un bâtiment qui contient trois unités ou plus notamment les triplex, les quadruplex, les duplex en rangée et les appartements proprement dits. Quel qu'en soit le nombre, les plain-pied qui font partie d'une construction non domiciliaire sont également comptés.

Transformation comprend le nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

NATURE DE LA CLASSIFICATION

La classification utilisée dans la présente publication porte sur les immeubles ou bâtiments à l'égard desquels la municipalité a émis un permis de bâtir. Une municipalité peut émettre un permis de bâtir aux fins suivantes: construction de nouveaux bâtiments; travaux de modifications, rajouts ou transformations; installation d'appareils de chauffage, de plomberie et autres commodités du genre; érection d'enseignes, d'affiches, de marquises, etc., et autres améliorations d'immeubles.

La classification des bâtiments **domiciliaires** a pour but de montrer la valeur des permis émis pour des logements nouveaux: simple, saisonnier, double, en rangée, d'appartement et de transformation; la valeur des travaux de modification et d'amélioration à des logements existants: rajout, modification, garages, piscines et autres améliorations.

Minor repair jobs such as painting, tiling, roofing etc., made to existing residential buildings in order to return them to their previous states are not included in the building permits series. Estimates of such repair work may be obtained from the publications *Construction in Canada* (Catalogue 64-201, Statistics Canada) and *Public Investment Outlook* (Catalogue 61-205, Statistics Canada).

The classification for **non-residential** buildings or structures is divided into three major groups pertaining to the use of the structures for industrial, commercial and government and institutional purposes. These major groups are further sub-divided into principal categories of each major group.

1. **Industrial** – Includes buildings used for: manufacturing and processing; transportation, communication and other utilities and agriculture, forestry, mine and mine mill buildings.

2. **Commercial** – Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial – signs, posters, heating and plumbing installations, etc.

3. **Institutional and Government** – Includes expenditures made by the community, public and government for buildings and structures – schools, universities, hospitals, clinics, churches, homes for the aged, blind, deaf and dumb, government office and administration buildings, law enforcement, public protection, national defence, and ancillary buildings such as dormitories, residences, church rectories, gymnasiums, heating plants, laundries and cafeterias for hospitals, schools or universities.

BASIS FOR CLASSIFICATION

The Classification of structures into major groups and sub-groups is dependent upon: the intended use of the structure in the case of new buildings; the present or intended use of the building to which alterations and improvements are being made; affiliation of the structure where the proposed structure is to provide ancillary facilities to the existing buildings; the principal use of the building where the intended use of the building is for more than one purpose.

On the building permit forms, the municipality reports; name and address of applicant (owner and agent); location of construction; intended use of the buildings – factory, school, church, etc.; class of work-

Les travaux de réparation qui sont destinés à rétablir un bâtiment dans son état initial (travaux de peinture, réfection de plancher, de toiture, etc.) ne sont pas compris dans la statistique des permis de bâtir. On peut toutefois obtenir une estimation de ces travaux en consultant *La construction au Canada* (nº 64-201 au catalogue de Statistique Canada) et *Perspectives des investissements privés et publics* (nº 61-205 au catalogue de Statistique Canada).

La classification des bâtiments **non domiciliaires** comporte trois groupes principaux fondés sur les destinations suivantes des immeubles: industrielle, commerciale et institutionnelle ou gouvernementale. Ces groupes se subdivisent à leur tour en catégories principales.

1. **Construction industrielle** – Comprend tout bâtiment destiné à la fabrication ou à la transformation de produits; au transport, aux communications et autres services d'utilité publique; à l'agriculture, à la sylviculture, à l'exploitation minière, y compris les installations de traitement des minéraux à la mine.

2. **Construction commerciale** – Comprend les magasins, entrepôts, garages, immeubles de bureaux, théâtres, hôtels, salons funéraires, salons de beauté, ainsi que des installations commerciales diverses – enseignes, affiches, chauffage, plomberie, etc.

3. **Construction institutionnelle et gouvernementale** – Comprend les dépenses faites par les collectivités, les corps publics et les gouvernements pour la construction d'immeubles ou bâtiments; par exemple, écoles, universités, hôpitaux, cliniques, églises, foyers pour vieillards, pour aveugles, pour sourds et muets; bureaux de gouvernement ou d'administration publique, services d'application de la loi, de protection du public, de défense nationale; enfin des bâtiments auxiliaires tels que dortoirs, résidences d'employés de service, presbytères, gymnases, chaufferies, buanderies et cafétérias d'hôpitaux, d'écoles ou d'universités.

FONDEMENT DE LA CLASSIFICATION

La classification des bâtiments en groupes et sous-groupes principaux se fondent sur les éléments ci-après: la destination prévue, dans le cas des immeubles nouveaux; l'utilisation réelle ou prévue des bâtiments auxquels des modifications ou améliorations sont effectuées; affiliation de l'immeuble où la construction envisagée a pour objet d'assurer des commodités accessoires; la principale utilisation de l'immeuble où la construction projetée est destinée à plus d'une fin.

Sur la formule de déclaration des permis de bâtir, la municipalité inscrit: les nom et adresse du requérant (propriétaire et agent); l'emplacement de la construction; la destination de l'immeuble – manufacture, école, église,

done – new, addition, etc.; the value of the proposed construction; and in the case of residential construction, number of dwelling units created.

The description given as to the intended use of the building, forms the basis for classification. If the structure is a new building or a conversion it is classified according to its intended use such as a factory, school, church, hospital, etc. Where the expenditure is of a repair nature, including all improvements to the property, alterations and additions, it may be classified as to the present use of the building, to which alterations are made or its intended use. If the construction work consists of installation of heating, plumbing or other such facilities, it will be classified as to the present use of the building. Where it includes an addition, such as a warehouse to a store, it will be classified to its intended use.

Where the construction work for institutional and government purposes provides additional facilities for existing buildings, these are classified according to the intended use of the existing structures. Examples are heating plants, cafeterias, nurses' residence for hospitals; dormitories, gymnasiums, libraries for universities; ancillary structures on prison farms, on Armed Force bases, etc.

A structure may have more than one intended use and therefore fall into more than one classification, and may be classified as to the principal use of the structure, or the value of proposed construction may be divided into more than one appropriate category. Where part of the structure is to provide additional facilities, whose value in relation to the principal use of the structure is relatively small, it will be classified as to its principal use. If the structure is a store and apartment, store and office building, restaurant and office building, etc., the value of the proposed construction may be divided among the appropriate classifications. However, where the principal use of the structure is a shopping centre but provides additional facilities such as banks, restaurants, etc., it will be classified as stores – the principal use of the structure.

etc.; la catégorie de travaux en cause – construction nouvelle, rajout, etc.; la valeur de la construction projetée et, dans le cas des constructions domiciliaires, le nombre d'unités de logement créé.

La description fournie relativement à l'utilisation éventuelle de l'immeuble constitue le fondement de la classification. S'il s'agit d'un nouveau bâtiment ou d'une transformation, l'ouvrage est classé selon sa destination – manufacture, école, église, hôpital, etc. Lorsque la dépense a pour objet des travaux de réparation, y compris toutes améliorations de propriété, modifications et rajouts, son classement peut s'effectuer en fonction de l'emploi que l'on fait déjà du bâtiment existant ou de la fin à laquelle on le destine. Si les travaux consistent en l'installation d'un système de chauffage, de plomberie ou d'autres commodités du genre, on les classe selon la fin à laquelle le bâtiment sert déjà. Lorsque les travaux comprennent un rajout, par exemple, l'addition d'un entrepôt à un magasin, le classement se fait d'après l'utilisation projetée.

Dans le cas où les travaux de construction effectués à des fins institutionnelles ou gouvernementales doivent assurer des commodités supplémentaires à des bâtiments existants, ces travaux sont classés d'après l'usage que l'on se propose de faire de l'immeuble existant. Voici des exemples pertinents: chaufferies, caféterias, résidences d'infirmières pour hôpitaux; dortoirs, gymnases, bibliothèques d'universités; constructions auxiliaires dans des fermes-prisons ou dans des bases des forces armées, etc.

Étant donné qu'une même construction peut être destinée à des fins multiples, elle peut rentrer dans plus d'une classe; il est possible, en effet, de classer pareille construction d'après sa destination principale, ou de répartir la valeur des travaux entre diverses catégories appropriées. Si une partie de l'immeuble a pour objet d'assurer des commodités supplémentaires dont la valeur, par rapport à l'utilisation principale dudit immeuble, se révèle passablement faible, les travaux seront classés en fonction du principal usage de l'immeuble lui-même. S'il s'agit d'un bâtiment formé d'un magasin et d'un appartement, d'un magasin et de bureaux, d'un restaurant et de bureaux, etc., la valeur de la construction projetée peut être répartie entre les diverses catégories appropriées. Cependant, si une construction sert surtout de centre commercial tout en offrant des services supplémentaires (banques, restaurants, etc.), on la classe parmi les magasins, ce qui correspond en l'occurence au principal emploi de la dite construction.

COVERAGE

The coverage of the Building Permits Survey can best be expressed in terms of the population of municipalities covered in the survey compared to the total population. Regular users of this publication will note that the table on page 11 reflects the coverage in terms of the 1976 Census population. For the purpose of approximating the coverage of the Building Permits Survey, the breakdown of the population into rural and urban areas is based on the rural-urban definition shown in the official 1976 Census. The urban population in 1976 consisted mainly of the population residing in cities, towns and villages, whether incorporated or not, and the "urbanized" or built-up residential fringes having a minimum population of 1,000 population and a density of at least 1,000 per square mile. The rest of the population was classified as rural.

In this publication, Metropolitan Areas are based on the 1976 Census definitions. They are defined as the main labour markets of a continuous builtup area having a population of 100,000 or more, corresponding to a commuting field or a zone where people could normally change their place of work without changing their place of residence. Although the 1976 Census defined Ottawa-Hull as a single metropolitan area, this publication treats this area as two distinct entities in their respective province.

Statistics Canada is currently endeavouring to extend the coverage of the survey in order to secure data from all municipalities issuing building permits. Thus, the coverage in terms of population may be expected to increase marginally, the population of the municipalities not reporting in the survey taken as a group being relatively small.

Although the results of the Building Permits Survey are often used as a leading indicator of building activity they may not be construed as representing the total construction activity in the country. Larger projects of a utilitarian character such as hydro-electric developments, filtration plants, pipelines, highways do not generally require building permits, and frequently large industrial plants are constructed outside the boundaries of a building permit issuing municipality.

COUVERTURE

La meilleure façon de mesurer la couverture de l'enquête sur les permis de bâtir consiste à comparer le chiffre de la population des municipalités visées au chiffre de la population totale. Les usagers de la présente publication remarqueront que le tableau de la page 11 donne un aperçu de la couverture de l'enquête en termes de la population du recensement 1976. Afin d'avoir une approximation de la couverture de l'enquête sur les permis de bâtir, la répartition rurale-urbaine de la population se fonde sur celle qui a été utilisée lors du recensement de 1976. La population urbaine en 1976 comprenait celle des cités, villes et villages de 1,000 habitants et plus, constitués ou non, et des zones "urbanisées" ou bâties à la périphérie, ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré. Le reste de la population était classée rurale.

Dans le présent rapport, les zones métropolitaines sont délimitées par les définitions du recensement de 1976. Elles sont définies comme le principal marché de travail d'une zone habitée continue ayant une population d'au moins 100,000 habitants, correspondant à une zone de déplacements quotidiens, soit celle dont les habitants pourraient normalement changer de lieu de travail sans changer de lieu de résidence. Bien que le recensement de 1976 définisse Ottawa-Hull comme une seule zone métropolitaine, la présente publication traite cette zone comme deux entités distinctes parce que situées dans des provinces différentes.

Statistique Canada essaie constamment d'étendre la couverture de l'enquête afin d'obtenir des données de toutes les municipalités émettant des permis de construire. On peut donc s'attendre que la couverture, exprimée en chiffre de population, s'accroisse, mais de peu seulement, vue que la population de l'ensemble des municipalités non soumises à l'enquête est relativement faible.

Même si les résultats de l'enquête sur les permis de bâtir sont souvent considérés comme un indicateur important de l'activité du bâtiment, on ne saurait estimer qu'ils représentent l'activité globale de la construction au pays. En effet, de vastes entreprises comme l'aménagement d'installations hydro-électriques, de pipelines et de routes ne requièrent pas de permis de bâtir et, bien souvent, de grandes usines se construisent en dehors des limites de toute municipalité émettant des permis de bâtir.

EXPLANATORY NOTES

The letter "L" after the name of a municipality indicates that the report of this municipality was not received on time for publication. If the letter "L" is not present and all columns contain a dash (–), this indicates that a "nil" report was received or that the value of permits issued during the month was less than $500.

The asterisk before the name of a municipality (Tables 11 and 12) indicates that it is a Metropolitan Area or a municipality comprised in an urban agglomeration of 10,000 population or more.

All current data are preliminary.

ABBREVIATIONS USED

Bor – Borough
C – City
CM – County Municipality
DM – District Municipality
ID – Improvement District
LGC – Local Government Community
LID – Local Improvement District
MD – Municipal District
P – Parish
PDC – Planning District Commission
RD – Rural District
RM – Rural Municipality
SV – Summer Village
T – Town
TP – Township
VL – Village

NOTES EXPLICATIVES

La présence de la lettre "L" après le nom d'une municipalité signifie que Statistique Canada n'a pas reçu de rapport de la municipalité à temps. Si la lettre "L" ne figure pas et que toutes les colonnes renferment un tiret (–), cela signifie qu'un rapport marqué "néant" a été reçu ou que la valeur des permis émis durant le mois en cause était inférieure à $500.

L'astérisque qui précède le nom d'une municipalité (tableaux 11 et 12) signifie qu'il s'agit d'une zone métropolitaine ou d'une municipalité comprise dans une agglomération urbaine de 10,000 âmes et plus.

Les chiffres courants sont préliminaires.

ABRÉVIATIONS EMPLOYÉES

C – Cité
CM – Comté (municipalité)
CT – Canton
CU – Cantons Unis
DM – Municipalité de district
ID – District d'amélioration
LGC – Centre d'administration locale
LID – District d'amélioration locale
MD – District municipal
P – Paroisse
RD – District rural
RM – Municipalité rurale
SD – Sans désignation
SV – Village d'été
V – Ville
VL – Village

TABLE I. Approximate Coverage of the Building Permits Survey in 1981

TABLEAU I. Couverture approximative de l'enquête sur les permis de bâtir en 1981

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A OV7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A OS9.

Inquiries about this publication should be addressed to:

Building Permits Section,
Construction Division,

Statistics Canada, Ottawa, K1A OT6 (telephone: 995-8213) or to a local Advisory Services office:

St. John's (Nfld.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A OV7, ou à Imprimerie et édition, Approvisionnements et Services Canada, Ottawa, K1A OS9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des permis de bâtir,
Division de la construction,

Statistique Canada, Ottawa, K1A OT6 (téléphone: 995-8213) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

INTRODUCTION

Statistics Canada conducts a monthly survey of building permits issued in Canada. The material contained in this publication is compiled from data supplied by the issuing municipalities and therefore, varies from municipality to municipality with the terms of each individual by-law, with the methods of estimating the value of construction for permit issuing purposes and with the diligence with which the terms of the by-law are applied. Information is not available on the permits allowed to lapse without the work for which the permit was issued being completed.

This publication presents statistics on building permits issued during the month for each municipality reporting in the survey. Totals are available for provinces, for metropolitan areas, for economic regions, for counties and finally for the country as a whole. Municipalities are listed individually showing building permits issued according to the following classification:

1. **Residential**

   (a) Number of dwelling units created: single, seasonal, double, row, apartment dwellings, conversions of existing structures into new dwelling units, and total number of dwelling units.

   (b) Value of building permits issued for residential construction including residential garages, swimming pools, alterations and improvements.

2. **Non-Residential**

   Value of building permits issued for new construction, alterations and improvements for industrial, commercial, institutional and government construction.

Area totals are the sum of the reporting municipalities and there is no allowance for municipalities not covered in the survey and for municipalities issuing permits but not reporting in the survey for the month in question. In some cases, reports from municipalities are received too late to be included in the relevant compilation; these municipalities are listed in the publication of the following month and a revised summary of building permits by county, by province and for Canada as a whole is made available in that month.

Statistique Canada effectue chaque mois un relevé des permis de bâtir émis au Canada. Les renseignements contenus dans la présente publication proviennent des données transmises par les municipalités qui émettent des permis; la statistique varie donc d'une municipalité à l'autre selon le règlement propre à chacune, selon les méthodes d'estimation des valeurs de construction appliquées aux fins d'émission des permis et selon la diligence avec laquelle les règlements eux-mêmes sont mis à exécution. On ne dispose d'aucun renseignement au sujet des permis pouvant déchoir sans que le travail prévu ait été exécuté.

La présente publication fournit la statistique des permis de bâtir émis au cours du mois par chaque municipalité participant à l'enquête. Des totaux figurent dans le cas des provinces, des zones métropolitaines, des régions économiques, des comtés et pour le Canada entier. Les municipalités sont énumérées individuellement, en regard des permis de bâtir répartis d'après la classification suivante:

1. **Construction domiciliaire**

   (a) Nombre de logements créés sous forme de maisons simples, de chalets, de maisons doubles, en rangée, d'appartements et de transformations de bâtiments en nouveaux logements, et nombre total d'unités de logement.

   (b) Valeur des permis de bâtir émis à l'égard de tous les travaux de construction domiciliaire, y compris les garages, les piscines, les modifications et les améliorations.

2. **Construction non-domiciliaire**

   Valeur des permis de bâtir émis à l'égard des travaux de construction neuve, de modification et d'amélioration à des bâtiments destinés à des fins industrielles, commerciales et institutionnelles ou gouvernementales.

Les totaux régionaux représentent la somme des chiffres fournis par les municipalités faisant rapport; ils ne tiennent pas compte des municipalités non comprises dans l'enquête, ni des municipalités qui émettent des permis mais qui n'ont pas fait rapport pour le mois en cause. Dans certains cas, les rapports de la municipalité parviennent à Statistique Canada trop tard pour qu'on puisse les inclure dans le calcul pertinent; en pareil cas, les données paraissent dans la publication du mois suivant, et l'on publie, ce mois-là, un sommaire révisé des permis de bâtir, par comté, par province et pour le Canada entier.

DEFINITIONS

Residential

Includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

Number of units shown under Residential construction indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains six apartments, it will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included.

Single residential units are structures containing only one dwelling unit completely separated from any other dwelling or structure.

Cottages are seasonal dwellings such as summer homes and house-boats.

Double residential units are dwellings found in structures containing two dwelling units such as duplexes and semi-detached dwellings.

Row dwellings are one-family dwellings in a structure of three or more attached dwellings.

Apartments inclure all multiple housing with three or more units such as triplexes, quadruplexes, row duplexes as well as apartments proper. Flats, regardless of number, which are part of a non-residential structure are also included.

Conversions consist of dwelling units added by conversion of existing structures.

NATURE OF CLASSIFICATION

This classification is one of buildings or structures for which a building permit was issued by a municipality. A building permit may be issued by municipalities for: construction of new buildings; alterations, additions or conversions to existing buildings; installations of heating, plumbing and other facilities; erection of signs, posters, canopies, etc., and other improvements to property.

The classification for **residential** construction is intended to reflect the value of building permits issued for new dwellings: single, seasonal, double, row, apartments and conversions; for alterations and improvements to existing dwellings: additions, structural changes, residential garages and swimming pools, and other improvements to existing structures.

DÉFINITIONS

Construction domiciliaire

Ne comprend que les logements indépendants, à l'exclusion de bâtiments tels que casernes et dortoirs.

Nombre d'unités, qui parait sous la rubrique Construction domiciliaire, correspond au nombre d'unités de logement indépendantes ajoutées. Par exemple, une nouvelle maison d'appartements de six logements comptera pour six unités de logement. Dans le cas de transformation de bâtiments en unités de logement additionnelles, on tient compte du nombre de nouvelles unités créées.

Logement simple s'entend des habitations à logement unique et indépendant de tout autre logement ou bâtiment.

Chalet s'entend de toute habitation saisonnière comme les maisons d'été et les maisons flottantes.

Logement double s'entend de toute maison d'habitation à deux logements comme les maisons jumelées et les duplex.

Logement en rangée s'entend de tout logement unifamilial compris dans un bâtiment formé d'au moins trois logements côte-à-côte.

Logement d'appartements s'entend de toute habitation comprise dans un bâtiment qui contient trois unités ou plus notamment les triplex, les quadruplex, les duplex en rangée et les appartements proprement dits. Quel qu'en soit le nombre, les plain-pied qui font partie d'une construction non domiciliaire sont également comptés.

Transformation comprend le nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

NATURE DE LA CLASSIFICATION

La classification utilisée dans la présente publication porte sur les immeubles ou bâtiments à l'égard desquels la municipalité a émis un permis de bâtir. Une municipalité peut émettre un permis de bâtir aux fins suivantes: construction de nouveaux bâtiments; travaux de modifications, rajouts ou transformations; installation d'appareils de chauffage, de plomberie et autres commodités du genre; érection d'enseignes, d'affiches, de marquises, etc., et autres améliorations d'immeubles.

La classification des bâtiments **domiciliaires** a pour but de montrer la valeur des permis émis pour des logements nouveaux: simple, saisonnier, double, en rangée, d'appartement et de transformation; la valeur des travaux de modification et d'amélioration à des logements existants: rajout, modification, garages, piscines et autres améliorations.

Minor repair jobs such as painting, tiling, roofing etc., made to existing residential buildings in order to return them to their previous states are not included in the building permits series. Estimates of such repair work may be obtained from the publications *Construction in Canada* (Catalogue 64-201, Statistics Canada) and *Public Investment Outlook* (Catalogue 61-205, Statistics Canada).

The classification for **non-residential** buildings or structures is divided into three major groups pertaining to the use of the structures for industrial, commercial and government and institutional purposes. These major groups are further sub-divided into principal categories of each major group.

1. **Industrial** – Includes buildings used for: manufacturing and processing; transportation, communication and other utilities and agriculture, forestry, mine and mine mill buildings.

2. **Commercial** – Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial – signs, posters, heating and plumbing installations, etc.

3. **Institutional and Government** – Includes expenditures made by the community, public and government for buildings and structures – schools, universities, hospitals, clinics, churches, homes for the aged, blind, deaf and dumb, government office and administration buildings, law enforcement, public protection, national defence, and ancillary buildings such as dormitories, residences, church rectories, gymnasiums, heating plants, laundries and cafeterias for hospitals, schools or universities.

BASIS FOR CLASSIFICATION

The Classification of structures into major groups and sub-groups is dependent upon: the intended use of the structure in the case of new buildings; the present or intended use of the building to which alterations and improvements are being made; affiliation of the structure where the proposed structure is to provide ancillary facilities to the existing buildings; the principal use of the building where the intended use of the building is for more than one purpose.

On the building permit forms, the municipality reports; name and address of applicant (owner and agent); location of construction; intended use of the buildings – factory, school, church, etc.; class of work-

Les travaux de réparation qui sont destinés à rétablir un bâtiment dans son état initial (travaux de peinture, réfection de plancher, de toiture, etc.) ne sont pas compris dans la statistique des permis de bâtir. On peut toutefois obtenir une estimation de ces travaux en consultant *La construction au Canada* (nº 64-201 au catalogue de Statistique Canada) et *Perspectives des investissements privés et publics* (nº 61-205 au catalogue de Statistique Canada).

La classification des bâtiments **non domiciliaires** comporte trois groupes principaux fondés sur les destinations suivantes des immeubles: industrielle, commerciale et institutionnelle ou gouvernementale. Ces groupes se subdivisent à leur tour en catégories principales.

1. **Construction industrielle** – Comprend tout bâtiment destiné à la fabrication ou à la transformation de produits; au transport, aux communications et autres services d'utilité publique; à l'agriculture, à la sylviculture, à l'exploitation minière, y compris les installations de traitement des minéraux à la mine.

2. **Construction commerciale** – Comprend les magasins, entrepôts, garages, immeubles de bureaux, théâtres, hôtels, salons funéraires, salons de beauté, ainsi que des installations commerciales diverses – enseignes, affiches, chauffage, plomberie, etc.

3. **Construction institutionnelle et gouvernementale** – Comprend les dépenses faites par les collectivités, les corps publics et les gouvernements pour la construction d'immeubles ou bâtiments; par exemple, écoles, universités, hôpitaux, cliniques, églises, foyers pour vieillards, pour aveugles, pour sourds et muets; bureaux de gouvernement ou d'administration publique, services d'application de la loi, de protection du public, de défense nationale; enfin des bâtiments auxiliaires tels que dortoirs, résidences d'employés de service, presbytères, gymnases, chaufferies, buanderies et cafétérias d'hôpitaux, d'écoles ou d'universités.

FONDEMENT DE LA CLASSIFICATION

La classification des bâtiments en groupes et sous-groupes principaux se fondent sur les éléments ci-après: la destination prévue, dans le cas des immeubles nouveaux; l'utilisation réelle ou prévue des bâtiments auxquels des modifications ou améliorations sont effectuées; affiliation de l'immeuble où la construction envisagée a pour objet d'assurer des commodités accessoires; la principale utilisation de l'immeuble où la construction projetée est destinée à plus d'une fin.

Sur la formule de déclaration des permis de bâtir, la municipalité inscrit: les nom et adresse du requérant (propriétaire et agent); l'emplacement de la construction; la destination de l'immeuble – manufacture, école, église,

done – new, addition, etc.; the value of the proposed construction; and in the case of residential construction, number of dwelling units created.

The description given as to the intended use of the building, forms the basis for classification. If the structure is a new building or a conversion it is classified according to its intended use such as a factory, school, church, hospital, etc. Where the expenditure is of a repair nature, including all improvements to the property, alterations and additions, it may be classified as to the present use of the building, to which alterations are made or its intended use. If the construction work consists of installation of heating, plumbing or other such facilities, it will be classified as to the present use of the building. Where it includes an addition, such as a warehouse to a store, it will be classified to its intended use.

Where the construction work for institutional and government purposes provides additional facilities for existing buildings, these are classified according to the intended use of the existing structures. Examples are heating plants, cafeterias, nurses' residence for hospitals; dormitories, gymnasiums, libraries for universities; ancillary structures on prison farms, on Armed Force bases, etc.

A structure may have more than one intended use and therefore fall into more than one classification, and may be classified as to the principal use of the structure, or the value of proposed construction may be divided into more than one appropriate category. Where part of the structure is to provide additional facilities, whose value in relation to the principal use of the structure is relatively small, it will be classified as to its principal use. If the structure is a store and apartment, store and office building, restaurant and office building, etc., the value of the proposed construction may be divided among the appropriate classifications. However, where the principal use of the structure is a shopping centre but provides additional facilities such as banks, restaurants, etc., it will be classified as stores – the principal use of the structure.

etc.; la catégorie de travaux en cause – construction nouvelle, rajout, etc.; la valeur de la construction projetée et, dans le cas des constructions domiciliaires, le nombre d'unités de logement créé.

La description fournie relativement à l'utilisation éventuelle de l'immeuble constitue le fondement de la classification. S'il s'agit d'un nouveau bâtiment ou d'une transformation, l'ouvrage est classé selon sa destination – manufacture, école, église, hôpital, etc. Lorsque la dépense a pour objet des travaux de réparation, y compris toutes améliorations de propriété, modifications et rajouts, son classement peut s'effectuer en fonction de l'emploi que l'on fait déjà du bâtiment existant ou de la fin à laquelle on le destine. Si les travaux consistent en l'installation d'un système de chauffage, de plomberie ou d'autres commodités du genre, on les classe selon la fin à laquelle le bâtiment sert déjà. Lorsque les travaux comprennent un rajout, par exemple, l'addition d'un entrepôt à un magasin, le classement se fait d'après l'utilisation projetée.

Dans le cas où les travaux de construction effectués à des fins institutionnelles ou gouvernementales doivent assurer des commodités supplémentaires à des bâtiments existants, ces travaux sont classés d'après l'usage que l'on se propose de faire de l'immeuble existant. Voici des exemples pertinents: chaufferies, caféterias, résidences d'infirmières pour hôpitaux; dortoirs, gymnases, bibliothèques d'universités; constructions auxiliaires dans des fermes-prisons ou dans des bases des forces armées, etc.

Étant donné qu'une même construction peut être destinée à des fins multiples, elle peut rentrer dans plus d'une classe; il est possible, en effet, de classer pareille construction d'après sa destination principale, ou de répartir la valeur des travaux entre diverses catégories appropriées. Si une partie de l'immeuble a pour objet d'assurer des commodités supplémentaires dont la valeur, par rapport à l'utilisation principale dudit immeuble, se révèle passablement faible, les travaux seront classés en fonction du principal usage de l'immeuble lui-même. S'il s'agit d'un bâtiment formé d'un magasin et d'un appartement, d'un magasin et de bureaux, d'un restaurant et de bureaux, etc., la valeur de la construction projetée peut être répartie entre les diverses catégories appropriées. Cependant, si une construction sert surtout de centre commercial tout en offrant des services supplémentaires (banques, restaurants, etc.), on la classe parmi les magasins, ce qui correspond en l'occurence au principal emploi de la dite construction.

COVERAGE

The coverage of the Building Permits Survey can best be expressed in terms of the population of municipalities covered in the survey compared to the total population. Regular users of this publication will note that the table on page 11 reflects the coverage in terms of the 1976 Census population. For the purpose of approximating the coverage of the Building Permits Survey, the breakdown of the population into rural and urban areas is based on the rural-urban definition shown in the official 1976 Census. The urban population in 1976 consisted mainly of the population residing in cities, towns and villages, whether incorporated or not, and the "urbanized" or built-up residential fringes having a minimum population of 1,000 population and a density of at least 1,000 per square mile. The rest of the population was classified as rural.

In this publication, Metropolitan Areas are based on the 1976 Census definitions. They are defined as the main labour markets of a continuous builtup area having a population of 100,000 or more, corresponding to a commuting field or a zone where people could normally change their place of work without changing their place of residence. Although the 1976 Census defined Ottawa-Hull as a single metropolitan area, this publication treats this area as two distinct entities in their respective province.

Statistics Canada is currently endeavouring to extend the coverage of the survey in order to secure data from all municipalities issuing building permits. Thus, the coverage in terms of population may be expected to increase marginally, the population of the municipalities not reporting in the survey taken as a group being relatively small.

Although the results of the Building Permits Survey are often used as a leading indicator of building activity they may not be construed as representing the total construction activity in the country. Larger projects of a utilitarian character such as hydro-electric developments, filtration plants, pipelines, highways do not generally require building permits, and frequently large industrial plants are constructed outside the boundaries of a building permit issuing municipality.

COUVERTURE

La meilleure façon de mesurer la couverture de l'enquête sur les permis de bâtir consiste à comparer le chiffre de la population des municipalités visées au chiffre de la population totale. Les usagers de la présente publication remarqueront que le tableau de la page 11 donne un aperçu de la couverture de l'enquête en termes de la population du recensement 1976. Afin d'avoir une approximation de la couverture de l'enquête sur les permis de bâtir, la répartition rurale-urbaine de la population se fonde sur celle qui a été utilisée lors du recensement de 1976. La population urbaine en 1976 comprenait celle des cités, villes et villages de 1,000 habitants et plus, constitués ou non, et des zones "urbanisées" ou bâties à la périphérie, ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré. Le reste de la population était classée rurale.

Dans le présent rapport, les zones métropolitaines sont délimitées par les définitions du recensement de 1976. Elles sont définies comme le principal marché de travail d'une zone habitée continue ayant une population d'au moins 100,000 habitants, correspondant à une zone de déplacements quotidiens, soit celle dont les habitants pourraient normalement changer de lieu de travail sans changer de lieu de résidence. Bien que le recensement de 1976 définisse Ottawa-Hull comme une seule zone métropolitaine, la présente publication traite cette zone comme deux entités distinctes parce que situées dans des provinces différentes.

Statistique Canada essaie constamment d'étendre la couverture de l'enquête afin d'obtenir des données de toutes les municipalités émettant des permis de construire. On peut donc s'attendre que la couverture, exprimée en chiffre de population, s'accroisse, mais de peu seulement, vue que la population de l'ensemble des municipalités non soumises à l'enquête est relativement faible.

Même si les résultats de l'enquête sur les permis de bâtir sont souvent considérés comme un indicateur important de l'activité du bâtiment, on ne saurait estimer qu'ils représentent l'activité globale de la construction au pays. En effet, de vastes entreprises comme l'aménagement d'installations hydro-électriques, de pipelines et de routes ne requièrent pas de permis de bâtir et, bien souvent, de grandes usines se construisent en dehors des limites de toute municipalité émettant des permis de bâtir.

EXPLANATORY NOTES

The letter "L" after the name of a municipality indicates that the report of this municipality was not received on time for publication. If the letter "L" is not present and all columns contain a dash (–), this indicates that a "nil" report was received or that the value of permits issued during the month was less than $500.

The asterisk before the name of a municipality (Tables 11 and 12) indicates that it is a Metropolitan Area or a municipality comprised in an urban agglomeration of 10,000 population or more.

All current data are preliminary.

ABBREVIATIONS USED

Bor – Borough
C – City
CM – County Municipality
DM – District Municipality
ID – Improvement District
LGC – Local Government Community
LID – Local Improvement District
MD – Municipal District
P – Parish
PDC – Planning District Commission
RD – Rural District
RM – Rural Municipality
SV – Summer Village
T – Town
TP – Township
VL – Village

NOTES EXPLICATIVES

La présence de la lettre "L" après le nom d'une municipalité signifie que Statistique Canada n'a pas reçu de rapport de la municipalité à temps. Si la lettre "L" ne figure pas et que toutes les colonnes renferment un tiret (–), cela signifie qu'un rapport marqué "néant" a été reçu ou que la valeur des permis émis durant le mois en cause était inférieure à $500.

L'astérisque qui précède le nom d'une municipalité (tableaux 11 et 12) signifie qu'il s'agit d'une zone métropolitaine ou d'une municipalité comprise dans une agglomération urbaine de 10,000 âmes et plus.

Les chiffres courants sont préliminaires.

ABRÉVIATIONS EMPLOYÉES

C – Cité
CM – Comté (municipalité)
CT – Canton
CU – Cantons Unis
DM – Municipalité de district
ID – District d'amélioration
LGC – Centre d'administration locale
LID – District d'amélioration locale
MD – District municipal
P – Paroisse
RD – District rural
RM – Municipalité rurale
SD – Sans désignation
SV – Village d'été
V – Ville
VL – Village

TABLE I. Approximate Coverage of the Building Permits Survey in 1981

TABLEAU I. Couverture approximative de l'enquête sur les permis de bâtir en 1981

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A OV7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A OS9.

Inquiries about this publication should be addressed to:

Building Permits Section,
Construction Division,

Statistics Canada, Ottawa, K1A OT6 (telephone: 995-8213) or to a local Advisory Services office:

St. John's (Nfld.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A OV7, ou à Imprimerie et édition, Approvisionnements et Services Canada, Ottawa, K1A OS9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des permis de bâtir,
Division de la construction,

Statistique Canada, Ottawa, K1A OT6 (téléphone: 995-8213) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

INTRODUCTION

Statistics Canada conducts a monthly survey of building permits issued in Canada. The material contained in this publication is compiled from data supplied by the issuing municipalities and therefore, varies from municipality to municipality with the terms of each individual by-law, with the methods of estimating the value of construction for permit issuing purposes and with the diligence with which the terms of the by-law are applied. Information is not available on the permits allowed to lapse without the work for which the permit was issued being completed.

This publication presents statistics on building permits issued during the month for each municipality reporting in the survey. Totals are available for provinces, for metropolitan areas, for economic regions, for counties and finally for the country as a whole. Municipalities are listed individually showing building permits issued according to the following classification:

1. **Residential**

   (a) Number of dwelling units created: single, seasonal, double, row, apartment dwellings, conversions of existing structures into new dwelling units, and total number of dwelling units.

   (b) Value of building permits issued for residential construction including residential garages, swimming pools, alterations and improvements.

2. **Non-Residential**

   Value of building permits issued for new construction, alterations and improvements for industrial, commercial, institutional and government construction.

Area totals are the sum of the reporting municipalities and there is no allowance for municipalities not covered in the survey and for municipalities issuing permits but not reporting in the survey for the month in question. In some cases, reports from municipalities are received too late to be included in the relevant compilation; these municipalities are listed in the publication of the following month and a revised summary of building permits by county, by province and for Canada as a whole is made available in that month.

Statistique Canada effectue chaque mois un relevé des permis de bâtir émis au Canada. Les renseignements contenus dans la présente publication proviennent des données transmises par les municipalités qui émettent des permis; la statistique varie donc d'une municipalité à l'autre selon le règlement propre à chacune, selon les méthodes d'estimation des valeurs de construction appliquées aux fins d'émission des permis et selon la diligence avec laquelle les règlements eux-mêmes sont mis à exécution. On ne dispose d'aucun renseignement au sujet des permis pouvant déchoir sans que le travail prévu ait été exécuté.

La présente publication fournit la statistique des permis de bâtir émis au cours du mois par chaque municipalité participant à l'enquête. Des totaux figurent dans le cas des provinces, des zones métropolitaines, des régions économiques, des comtés et pour le Canada entier. Les municipalités sont énumérées individuellement, en regard des permis de bâtir répartis d'après la classification suivante:

1. **Construction domiciliaire**

   (a) Nombre de logements créés sous forme de maisons simples, de chalets, de maisons doubles, en rangée, d'appartements et de transformations de bâtiments en nouveaux logements, et nombre total d'unités de logement.

   (b) Valeur des permis de bâtir émis à l'égard de tous les travaux de construction domiciliaire, y compris les garages, les piscines, les modifications et les améliorations.

2. **Construction non-domiciliaire**

   Valeur des permis de bâtir émis à l'égard des travaux de construction neuve, de modification et d'amélioration à des bâtiments destinés à des fins industrielles, commerciales et institutionnelles ou gouvernementales.

Les totaux régionaux représentent la somme des chiffres fournis par les municipalités faisant rapport; ils ne tiennent pas compte des municipalités non comprises dans l'enquête, ni des municipalités qui émettent des permis mais qui n'ont pas fait rapport pour le mois en cause. Dans certains cas, les rapports de la municipalité parviennent à Statistique Canada trop tard pour qu'on puisse les inclure dans le calcul pertinent; en pareil cas, les données paraissent dans la publication du mois suivant, et l'on publie, ce mois-là, un sommaire révisé des permis de bâtir, par comté, par province et pour le Canada entier.

DEFINITIONS

Residential

Includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

Number of units shown under Residential construction indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains six apartments, it will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included.

Single residential units are structures containing only one dwelling unit completely separated from any other dwelling or structure.

Cottages are seasonal dwellings such as summer homes and house-boats.

Double residential units are dwellings found in structures containing two dwelling units such as duplexes and semi-detached dwellings.

Row dwellings are one-family dwellings in a structure of three or more attached dwellings.

Apartments inclure all multiple housing with three or more units such as triplexes, quadruplexes, row duplexes as well as apartments proper. Flats, regardless of number, which are part of a non-residential structure are also included.

Conversions consist of dwelling units added by conversion of existing structures.

NATURE OF CLASSIFICATION

This classification is one of buildings or structures for which a building permit was issued by a municipality. A building permit may be issued by municipalities for: construction of new buildings; alterations, additions or conversions to existing buildings; installations of heating, plumbing and other facilities; erection of signs, posters, canopies, etc., and other improvements to property.

The classification for **residential** construction is intended to reflect the value of building permits issued for new dwellings: single, seasonal, double, row, apartments and conversions; for alterations and improvements to existing dwellings: additions, structural changes, residential garages and swimming pools, and other improvements to existing structures.

DÉFINITIONS

Construction domiciliaire

Ne comprend que les logements indépendants, à l'exclusion de bâtiments tels que casernes et dortoirs.

Nombre d'unités, qui parait sous la rubrique Construction domiciliaire, correspond au nombre d'unités de logement indépendantes ajoutées. Par exemple, une nouvelle maison d'appartements de six logements comptera pour six unités de logement. Dans le cas de transformation de bâtiments en unités de logement additionnelles, on tient compte du nombre de nouvelles unités créées.

Logement simple s'entend des habitations à logement unique et indépendant de tout autre logement ou bâtiment.

Chalet s'entend de toute habitation saisonnière comme les maisons d'été et les maisons flottantes.

Logement double s'entend de toute maison d'habitation à deux logements comme les maisons jumelées et les duplex.

Logement en rangée s'entend de tout logement unifamilial compris dans un bâtiment formé d'au moins trois logements côte-à-côte.

Logement d'appartements s'entend de toute habitation comprise dans un bâtiment qui contient trois unités ou plus notamment les triplex, les quadruplex, les duplex en rangée et les appartements proprement dits. Quel qu'en soit le nombre, les plain-pied qui font partie d'une construction non domiciliaire sont également comptés.

Transformation comprend le nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

NATURE DE LA CLASSIFICATION

La classification utilisée dans la présente publication porte sur les immeubles ou bâtiments à l'égard desquels la municipalité a émis un permis de bâtir. Une municipalité peut émettre un permis de bâtir aux fins suivantes: construction de nouveaux bâtiments; travaux de modifications, rajouts ou transformations; installation d'appareils de chauffage, de plomberie et autres commodités du genre; érection d'enseignes, d'affiches, de marquises, etc., et autres améliorations d'immeubles.

La classification des bâtiments **domiciliaires** a pour but de montrer la valeur des permis émis pour des logements nouveaux: simple, saisonnier, double, en rangée, d'appartement et de transformation; la valeur des travaux de modification et d'amélioration à des logements existants: rajout, modification, garages, piscines et autres améliorations.

Minor repair jobs such as painting, tiling, roofing etc., made to existing residential buildings in order to return them to their previous states are not included in the building permits series. Estimates of such repair work may be obtained from the publications *Construction in Canada* (Catalogue 64-201, Statistics Canada) and *Public Investment Outlook* (Catalogue 61-205, Statistics Canada).

The classification for **non-residential** buildings or structures is divided into three major groups pertaining to the use of the structures for industrial, commercial and government and institutional purposes. These major groups are further sub-divided into principal categories of each major group.

1. **Industrial** – Includes buildings used for: manufacturing and processing; transportation, communication and other utilities and agriculture, forestry, mine and mine mill buildings.

2. **Commercial** – Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial – signs, posters, heating and plumbing installations, etc.

3. **Institutional and Government** – Includes expenditures made by the community, public and government for buildings and structures – schools, universities, hospitals, clinics, churches, homes for the aged, blind, deaf and dumb, government office and administration buildings, law enforcement, public protection, national defence, and ancillary buildings such as dormitories, residences, church rectories, gymnasiums, heating plants, laundries and cafeterias for hospitals, schools or universities.

BASIS FOR CLASSIFICATION

The Classification of structures into major groups and sub-groups is dependent upon: the intended use of the structure in the case of new buildings; the present or intended use of the building to which alterations and improvements are being made; affiliation of the structure where the proposed structure is to provide ancillary facilities to the existing buildings; the principal use of the building where the intended use of the building is for more than one purpose.

On the building permit forms, the municipality reports; name and address of applicant (owner and agent); location of construction; intended use of the buildings – factory, school, church, etc.; class of work-

Les travaux de réparation qui sont destinés à rétablir un bâtiment dans son état initial (travaux de peinture, réfection de plancher, de toiture, etc.) ne sont pas compris dans la statistique des permis de bâtir. On peut toutefois obtenir une estimation de ces travaux en consultant *La construction au Canada* (nº 64-201 au catalogue de Statistique Canada) et *Perspectives des investissements privés et publics* (nº 61-205 au catalogue de Statistique Canada).

La classification des bâtiments **non domiciliaires** comporte trois groupes principaux fondés sur les destinations suivantes des immeubles: industrielle, commerciale et institutionnelle ou gouvernementale. Ces groupes se subdivisent à leur tour en catégories principales.

1. **Construction industrielle** – Comprend tout bâtiment destiné à la fabrication ou à la transformation de produits; au transport, aux communications et autres services d'utilité publique; à l'agriculture, à la sylviculture, à l'exploitation minière, y compris les installations de traitement des minéraux à la mine.

2. **Construction commerciale** – Comprend les magasins, entrepôts, garages, immeubles de bureaux, théâtres, hôtels, salons funéraires, salons de beauté, ainsi que des installations commerciales diverses – enseignes, affiches, chauffage, plomberie, etc.

3. **Construction institutionnelle et gouvernementale** – Comprend les dépenses faites par les collectivités, les corps publics et les gouvernements pour la construction d'immeubles ou bâtiments; par exemple, écoles, universités, hôpitaux, cliniques, églises, foyers pour vieillards, pour aveugles, pour sourds et muets; bureaux de gouvernement ou d'administration publique, services d'application de la loi, de protection du public, de défense nationale; enfin des bâtiments auxiliaires tels que dortoirs, résidences d'employés de service, presbytères, gymnases, chaufferies, buanderies et cafétérias d'hôpitaux, d'écoles ou d'universités.

FONDEMENT DE LA CLASSIFICATION

La classification des bâtiments en groupes et sous-groupes principaux se fondent sur les éléments ci-après: la destination prévue, dans le cas des immeubles nouveaux; l'utilisation réelle ou prévue des bâtiments auxquels des modifications ou améliorations sont effectuées; affiliation de l'immeuble où la construction envisagée a pour objet d'assurer des commodités accessoires; la principale utilisation de l'immeuble où la construction projetée est destinée à plus d'une fin.

Sur la formule de déclaration des permis de bâtir, la municipalité inscrit: les nom et adresse du requérant (propriétaire et agent); l'emplacement de la construction; la destination de l'immeuble – manufacture, école, église,

done – new, addition, etc.; the value of the proposed construction; and in the case of residential construction, number of dwelling units created.

The description given as to the intended use of the building, forms the basis for classification. If the structure is a new building or a conversion it is classified according to its intended use such as a factory, school, church, hospital, etc. Where the expenditure is of a repair nature, including all improvements to the property, alterations and additions, it may be classified as to the present use of the building, to which alterations are made or its intended use. If the construction work consists of installation of heating, plumbing or other such facilities, it will be classified as to the present use of the building. Where it includes an addition, such as a warehouse to a store, it will be classified to its intended use.

Where the construction work for institutional and government purposes provides additional facilities for existing buildings, these are classified according to the intended use of the existing structures. Examples are heating plants, cafeterias, nurses' residence for hospitals; dormitories, gymnasiums, libraries for universities; ancillary structures on prison farms, on Armed Force bases, etc.

A structure may have more than one intended use and therefore fall into more than one classification, and may be classified as to the principal use of the structure, or the value of proposed construction may be divided into more than one appropriate category. Where part of the structure is to provide additional facilities, whose value in relation to the principal use of the structure is relatively small, it will be classified as to its principal use. If the structure is a store and apartment, store and office building, restaurant and office building, etc., the value of the proposed construction may be divided among the appropriate classifications. However, where the principal use of the structure is a shopping centre but provides additional facilities such as banks, restaurants, etc., it will be classified as stores – the principal use of the structure.

etc.; la catégorie de travaux en cause – construction nouvelle, rajout, etc.; la valeur de la construction projetée et, dans le cas des constructions domiciliaires, le nombre d'unités de logement créé.

La description fournie relativement à l'utilisation éventuelle de l'immeuble constitue le fondement de la classification. S'il s'agit d'un nouveau bâtiment ou d'une transformation, l'ouvrage est classé selon sa destination – manufacture, école, église, hôpital, etc. Lorsque la dépense a pour objet des travaux de réparation, y compris toutes améliorations de propriété, modifications et rajouts, son classement peut s'effectuer en fonction de l'emploi que l'on fait déjà du bâtiment existant ou de la fin à laquelle on le destine. Si les travaux consistent en l'installation d'un système de chauffage, de plomberie ou d'autres commodités du genre, on les classe selon la fin à laquelle le bâtiment sert déjà. Lorsque les travaux comprennent un rajout, par exemple, l'addition d'un entrepôt à un magasin, le classement se fait d'après l'utilisation projetée.

Dans le cas où les travaux de construction effectués à des fins institutionnelles ou gouvernementales doivent assurer des commodités supplémentaires à des bâtiments existants, ces travaux sont classés d'après l'usage que l'on se propose de faire de l'immeuble existant. Voici des exemples pertinents: chaufferies, caféterias, résidences d'infirmières pour hôpitaux; dortoirs, gymnases, bibliothèques d'universités; constructions auxiliaires dans des fermes-prisons ou dans des bases des forces armées, etc.

Étant donné qu'une même construction peut être destinée à des fins multiples, elle peut rentrer dans plus d'une classe; il est possible, en effet, de classer pareille construction d'après sa destination principale, ou de répartir la valeur des travaux entre diverses catégories appropriées. Si une partie de l'immeuble a pour objet d'assurer des commodités supplémentaires dont la valeur, par rapport à l'utilisation principale dudit immeuble, se révèle passablement faible, les travaux seront classés en fonction du principal usage de l'immeuble lui-même. S'il s'agit d'un bâtiment formé d'un magasin et d'un appartement, d'un magasin et de bureaux, d'un restaurant et de bureaux, etc., la valeur de la construction projetée peut être répartie entre les diverses catégories appropriées. Cependant, si une construction sert surtout de centre commercial tout en offrant des services supplémentaires (banques, restaurants, etc.), on la classe parmi les magasins, ce qui correspond en l'occurence au principal emploi de la dite construction.

COVERAGE

The coverage of the Building Permits Survey can best be expressed in terms of the population of municipalities covered in the survey compared to the total population. Regular users of this publication will note that the table on page 11 reflects the coverage in terms of the 1976 Census population. For the purpose of approximating the coverage of the Building Permits Survey, the breakdown of the population into rural and urban areas is based on the rural-urban definition shown in the official 1976 Census. The urban population in 1976 consisted mainly of the population residing in cities, towns and villages, whether incorporated or not, and the "urbanized" or built-up residential fringes having a minimum population of 1,000 population and a density of at least 1,000 per square mile. The rest of the population was classified as rural.

In this publication, Metropolitan Areas are based on the 1976 Census definitions. They are defined as the main labour markets of a continuous builtup area having a population of 100,000 or more, corresponding to a commuting field or a zone where people could normally change their place of work without changing their place of residence. Although the 1976 Census defined Ottawa-Hull as a single metropolitan area, this publication treats this area as two distinct entities in their respective province.

Statistics Canada is currently endeavouring to extend the coverage of the survey in order to secure data from all municipalities issuing building permits. Thus, the coverage in terms of population may be expected to increase marginally, the population of the municipalities not reporting in the survey taken as a group being relatively small.

Although the results of the Building Permits Survey are often used as a leading indicator of building activity they may not be construed as representing the total construction activity in the country. Larger projects of a utilitarian character such as hydro-electric developments, filtration plants, pipelines, highways do not generally require building permits, and frequently large industrial plants are constructed outside the boundaries of a building permit issuing municipality.

COUVERTURE

La meilleure façon de mesurer la couverture de l'enquête sur les permis de bâtir consiste à comparer le chiffre de la population des municipalités visées au chiffre de la population totale. Les usagers de la présente publication remarqueront que le tableau de la page 11 donne un aperçu de la couverture de l'enquête en termes de la population du recensement 1976. Afin d'avoir une approximation de la couverture de l'enquête sur les permis de bâtir, la répartition rurale-urbaine de la population se fonde sur celle qui a été utilisée lors du recensement de 1976. La population urbaine en 1976 comprenait celle des cités, villes et villages de 1,000 habitants et plus, constitués ou non, et des zones "urbanisées" ou bâties à la périphérie, ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré. Le reste de la population était classée rurale.

Dans le présent rapport, les zones métropolitaines sont délimitées par les définitions du recensement de 1976. Elles sont définies comme le principal marché de travail d'une zone habitée continue ayant une population d'au moins 100,000 habitants, correspondant à une zone de déplacements quotidiens, soit celle dont les habitants pourraient normalement changer de lieu de travail sans changer de lieu de résidence. Bien que le recensement de 1976 définisse Ottawa-Hull comme une seule zone métropolitaine, la présente publication traite cette zone comme deux entités distinctes parce que situées dans des provinces différentes.

Statistique Canada essaie constamment d'étendre la couverture de l'enquête afin d'obtenir des données de toutes les municipalités émettant des permis de construire. On peut donc s'attendre que la couverture, exprimée en chiffre de population, s'accroisse, mais de peu seulement, vue que la population de l'ensemble des municipalités non soumises à l'enquête est relativement faible.

Même si les résultats de l'enquête sur les permis de bâtir sont souvent considérés comme un indicateur important de l'activité du bâtiment, on ne saurait estimer qu'ils représentent l'activité globale de la construction au pays. En effet, de vastes entreprises comme l'aménagement d'installations hydro-électriques, de pipelines et de routes ne requièrent pas de permis de bâtir et, bien souvent, de grandes usines se construisent en dehors des limites de toute municipalité émettant des permis de bâtir.

EXPLANATORY NOTES

The letter "L" after the name of a municipality indicates that the report of this municipality was not received on time for publication. If the letter "L" is not present and all columns contain a dash (–), this indicates that a "nil" report was received or that the value of permits issued during the month was less than $500.

The asterisk before the name of a municipality (Tables 11 and 12) indicates that it is a Metropolitan Area or a municipality comprised in an urban agglomeration of 10,000 population or more.

All current data are preliminary.

ABBREVIATIONS USED

Bor – Borough
C – City
CM – County Municipality
DM – District Municipality
ID – Improvement District
LGC – Local Government Community
LID – Local Improvement District
MD – Municipal District
P – Parish
PDC – Planning District Commission
RD – Rural District
RM – Rural Municipality
SV – Summer Village
T – Town
TP – Township
VL – Village

NOTES EXPLICATIVES

La présence de la lettre "L" après le nom d'une municipalité signifie que Statistique Canada n'a pas reçu de rapport de la municipalité à temps. Si la lettre "L" ne figure pas et que toutes les colonnes renferment un tiret (–), cela signifie qu'un rapport marqué "néant" a été reçu ou que la valeur des permis émis durant le mois en cause était inférieure à $500.

L'astérisque qui précède le nom d'une municipalité (tableaux 11 et 12) signifie qu'il s'agit d'une zone métropolitaine ou d'une municipalité comprise dans une agglomération urbaine de 10,000 âmes et plus.

Les chiffres courants sont préliminaires.

ABRÉVIATIONS EMPLOYÉES

C – Cité
CM – Comté (municipalité)
CT – Canton
CU – Cantons Unis
DM – Municipalité de district
ID – District d'amélioration
LGC – Centre d'administration locale
LID – District d'amélioration locale
MD – District municipal
P – Paroisse
RD – District rural
RM – Municipalité rurale
SD – Sans désignation
SV – Village d'été
V – Ville
VL – Village

TABLE I. Approximate Coverage of the Building Permits Survey in 1981

TABLEAU I. Couverture approximative de l'enquête sur les permis de bâtir en 1981

Province	Total population — Population totale 1976	Population of municipalities reporting in the survey — Population des municipalités ayant fait rapport	Per cent coverage — Pourcentage de couverture
Newfoundland — Terre-Neuve	557,725	322,918	57.89

Statistics Canada Statistique Canada

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A OV7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A OS9.

Inquiries about this publication should be addressed to:

Building Permits Section,
Construction Division,

Statistics Canada, Ottawa, K1A OT6 (telephone: 995-8213) or to a local Advisory Services office:

St. John's (Nfld.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A OV7, ou à Imprimerie et édition, Approvisionnements et Services Canada, Ottawa, K1A OS9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des permis de bâtir,
Division de la construction,

Statistique Canada, Ottawa, K1A OT6 (téléphone: 995-8213) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

INTRODUCTION

Statistics Canada conducts a monthly survey of building permits issued in Canada. The material contained in this publication is compiled from data supplied by the issuing municipalities and therefore, varies from municipality to municipality with the terms of each individual by-law, with the methods of estimating the value of construction for permit issuing purposes and with the diligence with which the terms of the by-law are applied. Information is not available on the permits allowed to lapse without the work for which the permit was issued being completed.

This publication presents statistics on building permits issued during the month for each municipality reporting in the survey. Totals are available for provinces, for metropolitan areas, for economic regions, for counties and finally for the country as a whole. Municipalities are listed individually showing building permits issued according to the following classification:

1. **Residential**

   (a) Number of dwelling units created: single, seasonal, double, row, apartment dwellings, conversions of existing structures into new dwelling units, and total number of dwelling units.

   (b) Value of building permits issued for residential construction including residential garages, swimming pools, alterations and improvements.

2. **Non-Residential**

   Value of building permits issued for new construction, alterations and improvements for industrial, commercial, institutional and government construction.

Area totals are the sum of the reporting municipalities and there is no allowance for municipalities not covered in the survey and for municipalities issuing permits but not reporting in the survey for the month in question. In some cases, reports from municipalities are received too late to be included in the relevant compilation; these municipalities are listed in the publication of the following month and a revised summary of building permits by county, by province and for Canada as a whole is made available in that month.

Statistique Canada effectue chaque mois un relevé des permis de bâtir émis au Canada. Les renseignements contenus dans la présente publication proviennent des données transmises par les municipalités qui émettent des permis; la statistique varie donc d'une municipalité à l'autre selon le règlement propre à chacune, selon les méthodes d'estimation des valeurs de construction appliquées aux fins d'émission des permis et selon la diligence avec laquelle les règlements eux-mêmes sont mis à exécution. On ne dispose d'aucun renseignement au sujet des permis pouvant déchoir sans que le travail prévu ait été exécuté.

La présente publication fournit la statistique des permis de bâtir émis au cours du mois par chaque municipalité participant à l'enquête. Des totaux figurent dans le cas des provinces, des zones métropolitaines, des régions économiques, des comtés et pour le Canada entier. Les municipalités sont énumérées individuellement, en regard des permis de bâtir répartis d'après la classification suivante:

1. **Construction domiciliaire**

   (a) Nombre de logements créés sous forme de maisons simples, de chalets, de maisons doubles, en rangée, d'appartements et de transformations de bâtiments en nouveaux logements, et nombre total d'unités de logement.

   (b) Valeur des permis de bâtir émis à l'égard de tous les travaux de construction domiciliaire, y compris les garages, les piscines, les modifications et les améliorations.

2. **Construction non-domiciliaire**

   Valeur des permis de bâtir émis à l'égard des travaux de construction neuve, de modification et d'amélioration à des bâtiments destinés à des fins industrielles, commerciales et institutionnelles ou gouvernementales.

Les totaux régionaux représentent la somme des chiffres fournis par les municipalités faisant rapport; ils ne tiennent pas compte des municipalités non comprises dans l'enquête, ni des municipalités qui émettent des permis mais qui n'ont pas fait rapport pour le mois en cause. Dans certains cas, les rapports de la municipalité parviennent à Statistique Canada trop tard pour qu'on puisse les inclure dans le calcul pertinent; en pareil cas, les données paraissent dans la publication du mois suivant, et l'on publie, ce mois-là, un sommaire révisé des permis de bâtir, par comté, par province et pour le Canada entier.

DEFINITIONS

Residential

Includes only self-contained housing units and, therefore, excludes such structures as barracks and dormitories.

Number of units shown under Residential construction indicates the number of self-contained dwelling units added. For example, if an apartment building is constructed and contains six apartments, it will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included.

Single residential units are structures containing only one dwelling unit completely separated from any other dwelling or structure.

Cottages are seasonal dwellings such as summer homes and house-boats.

Double residential units are dwellings found in structures containing two dwelling units such as duplexes and semi-detached dwellings.

Row dwellings are one-family dwellings in a structure of three or more attached dwellings.

Apartments inclure all multiple housing with three or more units such as triplexes, quadruplexes, row duplexes as well as apartments proper. Flats, regardless of number, which are part of a non-residential structure are also included.

Conversions consist of dwelling units added by conversion of existing structures.

NATURE OF CLASSIFICATION

This classification is one of buildings or structures for which a building permit was issued by a municipality. A building permit may be issued by municipalities for: construction of new buildings; alterations, additions or conversions to existing buildings; installations of heating, plumbing and other facilities; erection of signs, posters, canopies, etc., and other improvements to property.

The classification for **residential** construction is intended to reflect the value of building permits issued for new dwellings: single, seasonal, double, row, apartments and conversions; for alterations and improvements to existing dwellings: additions, structural changes, residential garages and swimming pools, and other improvements to existing structures.

DÉFINITIONS

Construction domiciliaire

Ne comprend que les logements indépendants, à l'exclusion de bâtiments tels que casernes et dortoirs.

Nombre d'unités, qui parait sous la rubrique Construction domiciliaire, correspond au nombre d'unités de logement indépendantes ajoutées. Par exemple, une nouvelle maison d'appartements de six logements comptera pour six unités de logement. Dans le cas de transformation de bâtiments en unités de logement additionnelles, on tient compte du nombre de nouvelles unités créées.

Logement simple s'entend des habitations à logement unique et indépendant de tout autre logement ou bâtiment.

Chalet s'entend de toute habitation saisonnière comme les maisons d'été et les maisons flottantes.

Logement double s'entend de toute maison d'habitation à deux logements comme les maisons jumelées et les duplex.

Logement en rangée s'entend de tout logement unifamilial compris dans un bâtiment formé d'au moins trois logements côte-à-côte.

Logement d'appartements s'entend de toute habitation comprise dans un bâtiment qui contient trois unités ou plus notamment les triplex, les quadruplex, les duplex en rangée et les appartements proprement dits. Quel qu'en soit le nombre, les plain-pied qui font partie d'une construction non domiciliaire sont également comptés.

Transformation comprend le nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

NATURE DE LA CLASSIFICATION

La classification utilisée dans la présente publication porte sur les immeubles ou bâtiments à l'égard desquels la municipalité a émis un permis de bâtir. Une municipalité peut émettre un permis de bâtir aux fins suivantes: construction de nouveaux bâtiments; travaux de modifications, rajouts ou transformations; installation d'appareils de chauffage, de plomberie et autres commodités du genre; érection d'enseignes, d'affiches, de marquises, etc., et autres améliorations d'immeubles.

La classification des bâtiments **domiciliaires** a pour but de montrer la valeur des permis émis pour des logements nouveaux: simple, saisonnier, double, en rangée, d'appartement et de transformation; la valeur des travaux de modification et d'amélioration à des logements existants: rajout, modification, garages, piscines et autres améliorations.

Minor repair jobs such as painting, tiling, roofing etc., made to existing residential buildings in order to return them to their previous states are not included in the building permits series. Estimates of such repair work may be obtained from the publications *Construction in Canada* (Catalogue 64-201, Statistics Canada) and *Public Investment Outlook* (Catalogue 61-205, Statistics Canada).

The classification for **non-residential** buildings or structures is divided into three major groups pertaining to the use of the structures for industrial, commercial and government and institutional purposes. These major groups are further sub-divided into principal categories of each major group.

1. **Industrial** – Includes buildings used for: manufacturing and processing; transportation, communication and other utilities and agriculture, forestry, mine and mine mill buildings.

2. **Commercial** – Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial – signs, posters, heating and plumbing installations, etc.

3. **Institutional and Government** – Includes expenditures made by the community, public and government for buildings and structures – schools, universities, hospitals, clinics, churches, homes for the aged, blind, deaf and dumb, government office and administration buildings, law enforcement, public protection, national defence, and ancillary buildings such as dormitories, residences, church rectories, gymnasiums, heating plants, laundries and cafeterias for hospitals, schools or universities.

BASIS FOR CLASSIFICATION

The Classification of structures into major groups and sub-groups is dependent upon: the intended use of the structure in the case of new buildings; the present or intended use of the building to which alterations and improvements are being made; affiliation of the structure where the proposed structure is to provide ancillary facilities to the existing buildings; the principal use of the building where the intended use of the building is for more than one purpose.

On the building permit forms, the municipality reports; name and address of applicant (owner and agent); location of construction; intended use of the buildings – factory, school, church, etc.; class of work-

Les travaux de réparation qui sont destinés à rétablir un bâtiment dans son état initial (travaux de peinture, réfection de plancher, de toiture, etc.) ne sont pas compris dans la statistique des permis de bâtir. On peut toutefois obtenir une estimation de ces travaux en consultant *La construction au Canada* (nº 64-201 au catalogue de Statistique Canada) et *Perspectives des investissements privés et publics* (nº 61-205 au catalogue de Statistique Canada).

La classification des bâtiments **non domiciliaires** comporte trois groupes principaux fondés sur les destinations suivantes des immeubles: industrielle, commerciale et institutionnelle ou gouvernementale. Ces groupes se subdivisent à leur tour en catégories principales.

1. **Construction industrielle** – Comprend tout bâtiment destiné à la fabrication ou à la transformation de produits; au transport, aux communications et autres services d'utilité publique; à l'agriculture, à la sylviculture, à l'exploitation minière, y compris les installations de traitement des minéraux à la mine.

2. **Construction commerciale** – Comprend les magasins, entrepôts, garages, immeubles de bureaux, théâtres, hôtels, salons funéraires, salons de beauté, ainsi que des installations commerciales diverses – enseignes, affiches, chauffage, plomberie, etc.

3. **Construction institutionnelle et gouvernementale** – Comprend les dépenses faites par les collectivités, les corps publics et les gouvernements pour la construction d'immeubles ou bâtiments; par exemple, écoles, universités, hôpitaux, cliniques, églises, foyers pour vieillards, pour aveugles, pour sourds et muets; bureaux de gouvernement ou d'administration publique, services d'application de la loi, de protection du public, de défense nationale; enfin des bâtiments auxiliaires tels que dortoirs, résidences d'employés de service, presbytères, gymnases, chaufferies, buanderies et cafétérias d'hôpitaux, d'écoles ou d'universités.

FONDEMENT DE LA CLASSIFICATION

La classification des bâtiments en groupes et sous-groupes principaux se fondent sur les éléments ci-après: la destination prévue, dans le cas des immeubles nouveaux; l'utilisation réelle ou prévue des bâtiments auxquels des modifications ou améliorations sont effectuées; affiliation de l'immeuble où la construction envisagée a pour objet d'assurer des commodités accessoires; la principale utilisation de l'immeuble où la construction projetée est destinée à plus d'une fin.

Sur la formule de déclaration des permis de bâtir, la municipalité inscrit: les nom et adresse du requérant (propriétaire et agent); l'emplacement de la construction; la destination de l'immeuble – manufacture, école, église,

done – new, addition, etc.; the value of the proposed construction; and in the case of residential construction, number of dwelling units created.

The description given as to the intended use of the building, forms the basis for classification. If the structure is a new building or a conversion it is classified according to its intended use such as a factory, school, church, hospital, etc. Where the expenditure is of a repair nature, including all improvements to the property, alterations and additions, it may be classified as to the present use of the building, to which alterations are made or its intended use. If the construction work consists of installation of heating, plumbing or other such facilities, it will be classified as to the present use of the building. Where it includes an addition, such as a warehouse to a store, it will be classified to its intended use.

Where the construction work for institutional and government purposes provides additional facilities for existing buildings, these are classified according to the intended use of the existing structures. Examples are heating plants, cafeterias, nurses' residence for hospitals; dormitories, gymnasiums, libraries for universities; ancillary structures on prison farms, on Armed Force bases, etc.

A structure may have more than one intended use and therefore fall into more than one classification, and may be classified as to the principal use of the structure, or the value of proposed construction may be divided into more than one appropriate category. Where part of the structure is to provide additional facilities, whose value in relation to the principal use of the structure is relatively small, it will be classified as to its principal use. If the structure is a store and apartment, store and office building, restaurant and office building, etc., the value of the proposed construction may be divided among the appropriate classifications. However, where the principal use of the structure is a shopping centre but provides additional facilities such as banks, restaurants, etc., it will be classified as stores – the principal use of the structure.

etc.; la catégorie de travaux en cause – construction nouvelle, rajout, etc.; la valeur de la construction projetée et, dans le cas des constructions domiciliaires, le nombre d'unités de logement créé.

La description fournie relativement à l'utilisation éventuelle de l'immeuble constitue le fondement de la classification. S'il s'agit d'un nouveau bâtiment ou d'une transformation, l'ouvrage est classé selon sa destination – manufacture, école, église, hôpital, etc. Lorsque la dépense a pour objet des travaux de réparation, y compris toutes améliorations de propriété, modifications et rajouts, son classement peut s'effectuer en fonction de l'emploi que l'on fait déjà du bâtiment existant ou de la fin à laquelle on le destine. Si les travaux consistent en l'installation d'un système de chauffage, de plomberie ou d'autres commodités du genre, on les classe selon la fin à laquelle le bâtiment sert déjà. Lorsque les travaux comprennent un rajout, par exemple, l'addition d'un entrepôt à un magasin, le classement se fait d'après l'utilisation projetée.

Dans le cas où les travaux de construction effectués à des fins institutionnelles ou gouvernementales doivent assurer des commodités supplémentaires à des bâtiments existants, ces travaux sont classés d'après l'usage que l'on se propose de faire de l'immeuble existant. Voici des exemples pertinents: chaufferies, caféterias, résidences d'infirmières pour hôpitaux; dortoirs, gymnases, bibliothèques d'universités; constructions auxiliaires dans des fermes-prisons ou dans des bases des forces armées, etc.

Étant donné qu'une même construction peut être destinée à des fins multiples, elle peut rentrer dans plus d'une classe; il est possible, en effet, de classer pareille construction d'après sa destination principale, ou de répartir la valeur des travaux entre diverses catégories appropriées. Si une partie de l'immeuble a pour objet d'assurer des commodités supplémentaires dont la valeur, par rapport à l'utilisation principale dudit immeuble, se révèle passablement faible, les travaux seront classés en fonction du principal usage de l'immeuble lui-même. S'il s'agit d'un bâtiment formé d'un magasin et d'un appartement, d'un magasin et de bureaux, d'un restaurant et de bureaux, etc., la valeur de la construction projetée peut être répartie entre les diverses catégories appropriées. Cependant, si une construction sert surtout de centre commercial tout en offrant des services supplémentaires (banques, restaurants, etc.), on la classe parmi les magasins, ce qui correspond en l'occurence au principal emploi de la dite construction.

COVERAGE

The coverage of the Building Permits Survey can best be expressed in terms of the population of municipalities covered in the survey compared to the total population. Regular users of this publication will note that the table on page 11 reflects the coverage in terms of the 1976 Census population. For the purpose of approximating the coverage of the Building Permits Survey, the breakdown of the population into rural and urban areas is based on the rural-urban definition shown in the official 1976 Census. The urban population in 1976 consisted mainly of the population residing in cities, towns and villages, whether incorporated or not, and the "urbanized" or built-up residential fringes having a minimum population of 1,000 population and a density of at least 1,000 per square mile. The rest of the population was classified as rural.

In this publication, Metropolitan Areas are based on the 1976 Census definitions. They are defined as the main labour markets of a continuous builtup area having a population of 100,000 or more, corresponding to a commuting field or a zone where people could normally change their place of work without changing their place of residence. Although the 1976 Census defined Ottawa-Hull as a single metropolitan area, this publication treats this area as two distinct entities in their respective province.

Statistics Canada is currently endeavouring to extend the coverage of the survey in order to secure data from all municipalities issuing building permits. Thus, the coverage in terms of population may be expected to increase marginally, the population of the municipalities not reporting in the survey taken as a group being relatively small.

Although the results of the Building Permits Survey are often used as a leading indicator of building activity they may not be construed as representing the total construction activity in the country. Larger projects of a utilitarian character such as hydro-electric developments, filtration plants, pipelines, highways do not generally require building permits, and frequently large industrial plants are constructed outside the boundaries of a building permit issuing municipality.

COUVERTURE

La meilleure façon de mesurer la couverture de l'enquête sur les permis de bâtir consiste à comparer le chiffre de la population des municipalités visées au chiffre de la population totale. Les usagers de la présente publication remarqueront que le tableau de la page 11 donne un aperçu de la couverture de l'enquête en termes de la population du recensement 1976. Afin d'avoir une approximation de la couverture de l'enquête sur les permis de bâtir, la répartition rurale-urbaine de la population se fonde sur celle qui a été utilisée lors du recensement de 1976. La population urbaine en 1976 comprenait celle des cités, villes et villages de 1,000 habitants et plus, constitués ou non, et des zones "urbanisées" ou bâties à la périphérie, ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré. Le reste de la population était classée rurale.

Dans le présent rapport, les zones métropolitaines sont délimitées par les définitions du recensement de 1976. Elles sont définies comme le principal marché de travail d'une zone habitée continue ayant une population d'au moins 100,000 habitants, correspondant à une zone de déplacements quotidiens, soit celle dont les habitants pourraient normalement changer de lieu de travail sans changer de lieu de résidence. Bien que le recensement de 1976 définisse Ottawa-Hull comme une seule zone métropolitaine, la présente publication traite cette zone comme deux entités distinctes parce que situées dans des provinces différentes.

Statistique Canada essaie constamment d'étendre la couverture de l'enquête afin d'obtenir des données de toutes les municipalités émettant des permis de construire. On peut donc s'attendre que la couverture, exprimée en chiffre de population, s'accroisse, mais de peu seulement, vue que la population de l'ensemble des municipalités non soumises à l'enquête est relativement faible.

Même si les résultats de l'enquête sur les permis de bâtir sont souvent considérés comme un indicateur important de l'activité du bâtiment, on ne saurait estimer qu'ils représentent l'activité globale de la construction au pays. En effet, de vastes entreprises comme l'aménagement d'installations hydro-électriques, de pipelines et de routes ne requièrent pas de permis de bâtir et, bien souvent, de grandes usines se construisent en dehors des limites de toute municipalité émettant des permis de bâtir.

EXPLANATORY NOTES

The letter "L" after the name of a municipality indicates that the report of this municipality was not received on time for publication. If the letter "L" is not present and all columns contain a dash (–), this indicates that a "nil" report was received or that the value of permits issued during the month was less than $500.

The asterisk before the name of a municipality (Tables 11 and 12) indicates that it is a Metropolitan Area or a municipality comprised in an urban agglomeration of 10,000 population or more.

All current data are preliminary.

ABBREVIATIONS USED

Bor – Borough
C – City
CM – County Municipality
DM – District Municipality
ID – Improvement District
LGC – Local Government Community
LID – Local Improvement District
MD – Municipal District
P – Parish
PDC – Planning District Commission
RD – Rural District
RM – Rural Municipality
SV – Summer Village
T – Town
TP – Township
VL – Village

NOTES EXPLICATIVES

La présence de la lettre "L" après le nom d'une municipalité signifie que Statistique Canada n'a pas reçu de rapport de la municipalité à temps. Si la lettre "L" ne figure pas et que toutes les colonnes renferment un tiret (–), cela signifie qu'un rapport marqué "néant" a été reçu ou que la valeur des permis émis durant le mois en cause était inférieure à $500.

L'astérisque qui précède le nom d'une municipalité (tableaux 11 et 12) signifie qu'il s'agit d'une zone métropolitaine ou d'une municipalité comprise dans une agglomération urbaine de 10,000 âmes et plus.

Les chiffres courants sont préliminaires.

ABRÉVIATIONS EMPLOYÉES

C – Cité
CM – Comté (municipalité)
CT – Canton
CU – Cantons Unis
DM – Municipalité de district
ID – District d'amélioration
LGC – Centre d'administration locale
LID – District d'amélioration locale
MD – District municipal
P – Paroisse
RD – District rural
RM – Municipalité rurale
SD – Sans désignation
SV – Village d'été
V – Ville
VL – Village

TABLE I. Approximate Coverage of the Building Permits Survey in 1981

TABLEAU I. Couverture approximative de l'enquête sur les permis de bâtir en 1981
